

panic disorder: breathing fast, irregular heartbeat, abnormal involuntary movements, palpitations, anxiety and nervousness, insomnia, chest tightness, depression, depressive or psychotic symptoms, shortness of breath, dizziness

vocal cord polyp: difficulty speaking, throat swelling, hoarse voice, throat feels tight, sore throat

turner syndrome: depression, emotional symptoms

cryptorchidism: symptoms of the scrotum and testes, swelling of scrotum, lack of growth

poisoning due to ethylene glycol: depression, depressive or psychotic symptoms, abusing alcohol, fainting

atrophic vaginitis: vaginal discharge, involuntary urination, vaginal itching, pain during intercourse, blood in urine, suprapubic pain, painful urination, frequent urination

fracture of the hand: arm stiffness or tightness, hand or finger swelling, hand or finger pain, hand or finger stiffness or tightness, arm pain, wrist pain, wrist stiffness or tightness, wrist swelling

cellulitis or abscess of mouth: throat swelling, abnormal appearing skin, difficulty in swallowing, toothache, skin growth, lip swelling, sore throat

eye alignment disorder: irregular appearing scalp, eye moves abnormally, lack of growth, cross-eyed, diminished vision, double vision, eye deviation, symptoms of eye, pain in eye

headache after lumbar puncture: neck pain, headache, low back pain, painful urination, nausea, vomiting, dizziness

pyloric stenosis: arm stiffness or tightness, vomiting, cough

salivary gland disorder: swollen lymph nodes, cough, throat feels tight, sore throat

osteochondrosis: knee pain, hand or finger pain, ankle pain, bowlegged or knock-kneed, elbow pain, foot or toe pain

injury to the knee: knee pain, leg pain, foot or toe swelling, knee weakness, problems with movement

metabolic disorder: arm stiffness or tightness, jaundice, weight gain, smoking problems

vaginitis: vaginal discharge, vaginal redness, vaginal itching, pain during intercourse, vaginal pain, pain during pregnancy, lower abdominal pain, suprapubic pain, painful urination, pelvic pain, sharp abdominal pain

sick sinus syndrome: irregular heartbeat, palpitations, decreased heart rate, weakness, increased heart rate, fainting, shortness of breath, dizziness

tinnitus of unknown cause: headache, itchy ear(s), hoarse voice, ringing in ear, plugged feeling in ear, diminished hearing, ear pain, dizziness

glaucoma: itchiness of eye, eye redness, foreign body sensation in eye, diminished vision, lacrimation, symptoms of eye, spots or clouds in vision, pain in eye, itchy eyelid

eating disorder: acne or pimples, anxiety and nervousness, decreased appetite, insomnia, weight gain, abusing alcohol, depression, depressive or psychotic symptoms, difficulty eating

transient ischemic attack: paresthesia, difficulty speaking, headache, symptoms of the face, weakness, loss of sensation, depressive or psychotic symptoms, dizziness, focal weakness, disturbance of memory

pyelonephritis: side pain, low back pain, blood in urine, lower abdominal pain, suprapubic pain, painful urination, frequent urination, nausea, vomiting, back pain, sharp abdominal pain

rotator cuff injury: arm stiffness or tightness, shoulder pain, hand or finger stiffness or tightness, arm pain, shoulder stiffness or tightness, shoulder weakness

chronic pain disorder: shoulder pain, knee pain, leg pain, headache, low back pain, ache all over, hip pain, pelvic pain, back pain, sharp abdominal pain

problem during pregnancy: spotting or bleeding during pregnancy, problems during pregnancy, headache, pain during pregnancy, lower abdominal pain, cramps and spasms, nausea, pelvic pain, vomiting, back pain, sharp abdominal pain

liver cancer: groin mass, decreased appetite, stomach bloating, upper abdominal pain, sharp abdominal pain

atelectasis: sharp chest pain, cough, headache, shortness of breath, dizziness, sore throat

injury to the hand: hand or finger swelling, hand or finger pain, hand or finger stiffness or tightness, wrist pain, skin growth, joint pain, wrist swelling

choledocholithiasis: chills, sharp chest pain, side pain, jaundice, decreased appetite, upper abdominal pain, nausea, vomiting, sharp abdominal pain

injury to the hip: hip pain, hand or finger swelling, leg pain, neck pain

cirrhosis: regurgitation, shortness of breath, abdominal distention, upper abdominal pain, peripheral edema, blood in stool, vomiting blood, regurgitation, sharp abdominal pain

thoracic aortic aneurysm: sharp chest pain, jaundice, chest tightness, shortness of breath, dizziness, sharp abdominal pain, fatigue

subdural hemorrhage: facial pain, headache, irritable infant, depressive or psychotic symptoms, vomiting, dizziness

diabetic retinopathy: itchiness of eye, abnormal movement of eyelid, foreign body sensation in eye, diminished vision, double vision, lacrimation, symptoms of eye, spots or clouds in vision, pain in eye

fibromyalgia: sharp chest pain, neck pain, headache, low back pain, leg pain, ache all over, arm pain, hip pain, back pain, muscle pain

ischemia of the bowel: constipation, burning abdominal pain, vomiting, nausea, blood in stool, sharp abdominal pain, retention of urine

fetal alcohol syndrome: excessive anger, emotional symptoms, depressive or psychotic symptoms

peritonitis: sharp abdominal pain, side pain, groin mass, intermenstrual bleeding, nausea, vomiting, back pain, shortness of breath

injury to the abdomen: sharp chest pain, leg pain, blood in urine, back pain, sharp abdominal pain

acute pancreatitis: diarrhea, sharp chest pain, side pain, lower body pain, burning abdominal pain, hemoptysis, abusing alcohol, nausea, upper abdominal pain, vomiting, back pain, sharp abdominal pain

thrombophlebitis: lymphedema, arm swelling, leg pain, ache all over, arm pain, skin swelling, foot or toe pain, skin on leg or foot looks infected, leg swelling

asthma: coughing up sputum, sharp chest pain, cough, allergic reaction, chest tightness, wheezing, coryza, fever, shortness of breath, difficulty breathing, nasal congestion

foreign body in the vagina: painful urination, vaginal discharge, emotional symptoms

restless leg syndrome: leg pain, headache, insomnia, depression, sleepiness, apnea, abnormal involuntary movements, fatigue

emphysema: shortness of breath, sharp chest pain, emotional symptoms, cough

cysticercosis: elbow weakness, seizures, shortness of breath, headache

induced abortion: spotting or bleeding during pregnancy, vaginal discharge, pain during pregnancy, groin pain, lower abdominal pain, intermenstrual bleeding, cramps and spasms, sharp abdominal pain

teething syndrome: diarrhea, cough, temper problems, decreased appetite, symptoms of infants, fever, ear pain, nasal congestion, redness in ear

infectious gastroenteritis: diarrhea, fluid retention, chills, headache, decreased appetite, burning abdominal pain, vomiting, nausea, blood in stool, flu-like syndrome, sharp abdominal pain, fever

acute sinusitis: coughing up sputum, facial pain, cough, frontal headache, sinus congestion, painful sinuses, coryza, fever, ear pain, sore throat, nasal congestion

substance-related mental disorder: anxiety and nervousness, delusions or hallucinations, feeling ill, insomnia, drug abuse, hostile behavior, depressive or psychotic symptoms

postpartum depression: excessive anger, pain during pregnancy, anxiety and nervousness, drug abuse, delusions or hallucinations, intermenstrual bleeding, depression, depressive or psychotic symptoms, problems during pregnancy

coronary atherosclerosis: leg cramps or spasms, sharp chest pain, burning chest pain, irregular heartbeat, palpitations, chest tightness, shortness of breath, fatigue

spondylitis: side pain, leg pain, back mass or lump, low back pain, neck pain, lower body pain, hip pain, back pain, stiffness all over

pituitary adenoma: muscle swelling, pain in eye, nausea, headache

uterine fibroids: involuntary urination, lower abdominal pain, intermenstrual bleeding, heavy menstrual flow, unpredictable menstruation, cramps and spasms, pelvic pain, painful menstruation, sharp abdominal pain

idiopathic nonmenstrual bleeding: vaginal discharge, long menstrual periods, painful urination, unpredictable menstruation, intermenstrual bleeding, sharp abdominal pain

chalazion: eye redness, mass on eyelid, foreign body sensation in eye, diminished vision, swollen eye, lacrimation, symptoms of eye, skin growth, pain in eye, eyelid swelling

ovarian torsion: groin mass, ache all over, lower abdominal pain, skin swelling, pelvic pain, sharp abdominal pain

retinopathy due to high blood pressure: pus draining from ear, foreign body sensation in eye, diminished vision, symptoms of eye, spots or clouds in vision, pain in eye

vaginal yeast infection: vaginal discharge, vulvar irritation, vaginal redness, vaginal itching, lower abdominal pain, itching of skin, suprapubic pain, painful urination, vaginal pain, sharp abdominal pain

mastoiditis: facial pain, cough, diminished hearing, ear pain, dizziness, nasal congestion

lung contusion: ache all over, back pain, shortness of breath, sharp chest pain

hypertrophic obstructive cardiomyopathy (hocm): anxiety and nervousness, emotional symptoms, sharp chest pain

ingrown toe nail: foot or toe swelling, abnormal appearing skin, irregular appearing nails, neck swelling, skin dryness, peeling, scaliness, or roughness, foot or toe pain, skin on leg or foot looks infected, skin growth, swollen eye, skin on arm or hand looks infected

pulmonary eosinophilia: paresthesia, sharp chest pain, cough, fever, shortness of breath, dizziness, nasal congestion

corneal disorder: white discharge from eye, itchiness of eye, eye redness, foreign body sensation in eye, diminished vision, double vision, lacrimation, symptoms of eye, spots or clouds in vision, pain in eye

foreign body in the gastrointestinal tract: lump in throat, difficulty in swallowing, vomiting blood, vomiting, recent weight loss, sharp abdominal pain

endophthalmitis: itchiness of eye, eye redness, painful urination, diminished vision, swollen eye, pain in eye

intestinal malabsorption: diarrhea, cough, allergic reaction, vomiting, sharp abdominal pain, flatulence, nasal congestion

viral warts: warts, acne or pimples, abnormal appearing skin, skin moles, skin swelling, skin lesion, skin growth, lip swelling, bumps on penis

hyperhidrosis: warts, sweating, cough, acne or pimples, fever

stroke: seizures, difficulty speaking, headache, slurring words, problems with movement, depressive or psychotic symptoms, abnormal involuntary movements, dizziness, focal weakness, disturbance of memory

pilonidal cyst: pain of the anus, ache all over, lower body pain, irregular appearing scalp, skin swelling, bones are painful, skin growth, pelvic pain

crushing injury: hand or finger swelling, hand or finger pain, hand or finger stiffness or tightness, neck swelling, foot or toe pain, knee swelling

normal pressure hydrocephalus: palpitations, problems with movement, depressive or psychotic symptoms, headache

alopecia: acne or pimples, too little hair, irregular appearing scalp, itching of skin, feeling ill, skin swelling, skin rash, skin growth

hashimoto thyroiditis: weight gain, abnormal involuntary movements

flat feet: knee pain, ankle pain, skin swelling, problems with movement, foot or toe pain

nonalcoholic liver disease (nash): mouth ulcer, weight gain, nausea, dizziness, sharp abdominal pain

hemarthrosis: elbow weakness, frequent urination, knee pain, knee swelling

pelvic organ prolapse: vaginal discharge, involuntary urination, blood in urine, suprapubic pain, intermenstrual bleeding, frequent urination, vaginal pain, symptoms of bladder, retention of urine

fracture of the arm: arm stiffness or tightness, shoulder pain, arm swelling, elbow swelling, arm pain, wrist pain, elbow pain, wrist stiffness or tightness, shoulder stiffness or tightness, wrist swelling

coagulation (bleeding) disorder: leg pain, eye redness, blood in urine, melena, knee swelling

intracranial hemorrhage: seizures, difficulty speaking, headache, diminished vision, depressive or psychotic symptoms, vomiting, abnormal involuntary movements, dizziness

hyperkalemia: sharp chest pain, decreased heart rate, weakness, feeling ill, difficulty in swallowing, depressive or psychotic symptoms, nausea, vomiting, shortness of breath, dizziness

cornea infection: itchiness of eye, eye redness, eye burns or stings, foreign body sensation in eye, diminished vision, swollen eye, lacrimation, symptoms of eye, lip swelling, spots or clouds in vision, pain in eye

abscess of the lung: cough, shortness of breath, depressive or psychotic symptoms, itchy eyelid

dengue fever: wrist pain, sore throat

chronic sinusitis: facial pain, cough, headache, frontal headache, sinus congestion, painful sinuses, fever, ear pain, sore throat, congestion in chest

cholesteatoma: pus draining from ear, muscle swelling, nasal congestion, diminished hearing

volvulus: vomiting, elbow weakness, sharp abdominal pain, depressive or psychotic symptoms

injury to the finger: swelling of scrotum, hand or finger stiffness or tightness, hand or finger swelling, hand or finger pain

poisoning due to analgesics: skin swelling, depression, abusing alcohol, depressive or psychotic symptoms, vomiting, problems during pregnancy

atrial fibrillation: sharp chest pain, irregular heartbeat, palpitations, decreased heart rate, increased heart rate, shortness of breath, dizziness, fatigue

pinworm infection: pain of the anus, constipation, itching of the anus, painful urination, sharp abdominal pain, retention of urine

urethral valves: side pain, lower abdominal pain, suprapubic pain, elbow weakness, sharp abdominal pain

open wound of the neck: abnormal appearing skin, ache all over, skin swelling, skin lesion, peripheral edema

achalasia: sharp chest pain, cough, difficulty in swallowing, chest tightness, throat feels tight

conductive hearing loss: difficulty speaking, hoarse voice, ringing in ear, fluid in ear, plugged feeling in ear, low self-esteem, diminished hearing, ear pain, dizziness, redness in ear

abdominal hernia: regurgitation, groin mass, symptoms of the scrotum and testes, ache all over, lower abdominal pain, upper abdominal pain, irregular belly button, regurgitation, sharp abdominal pain, swollen abdomen

cerebral palsy: seizures, infant feeding problem, blindness, lack of growth, problems with movement, cramps and spasms

marijuana abuse: fears and phobias, excessive anger, difficulty speaking, anxiety and nervousness, delusions or hallucinations, drug abuse, depression, hostile behavior, depressive or psychotic symptoms, abusing alcohol, low self-esteem, temper problems

cryptococcosis: cross-eyed, depressive or psychotic symptoms

obesity: weight gain, excessive appetite, sleepiness

indigestion: diarrhea, sharp chest pain, decreased appetite, burning abdominal pain, stomach bloating, heartburn, nausea, vomiting, sharp abdominal pain

bursitis: arm stiffness or tightness, shoulder pain, arm swelling, knee pain, leg pain, elbow swelling, arm pain, hip pain, elbow pain, knee swelling, shoulder stiffness or tightness, leg swelling

esophageal cancer: hoarse voice, decreased appetite, stomach bloating, shortness of breath, sharp abdominal pain

pulmonary congestion: sharp chest pain, cough, decreased heart rate, weakness, chest tightness, nasal congestion, fever, shortness of breath, leg swelling

juvenile rheumatoid arthritis: knee pain, hand or finger pain, back pain, wrist swelling, joint pain

actinic keratosis: skin irritation, abnormal appearing skin, skin moles, irregular appearing scalp, itching of skin, skin swelling, skin dryness, peeling, scaliness, or roughness, skin rash, skin lesion, skin growth, symptoms of the face

acute otitis media: cough, plugged feeling in ear, fluid in ear, coryza, diminished hearing, fever, ear pain, sore throat, nasal congestion, redness in ear

astigmatism: foreign body sensation in eye, diminished vision, double vision, lacrimation, eye deviation, symptoms of eye, spots or clouds in vision, pain in eye

tuberous sclerosis: seizures, elbow weakness, depressive or psychotic symptoms

empyema: shortness of breath, sharp chest pain, cough, leg pain

presbycusis: emotional symptoms, ringing in ear, diminished hearing, ear pain, dizziness

neonatal jaundice: jaundice, infant feeding problem, changes in stool appearance, irritable infant, lack of growth

chronic obstructive pulmonary disease (copd): coughing up sputum, sharp chest pain, cough, congestion in chest, chest tightness, wheezing, coryza, fever, shortness of breath, sore throat, nasal congestion

dislocation of the elbow: arm stiffness or tightness, elbow swelling, irritable infant, arm pain, wrist pain, depression, elbow pain

spondylosis: shoulder pain, paresthesia, knee pain, neck pain, leg pain, low back pain, ache all over, lower body pain, loss of sensation, arm pain, hip pain, back pain

herpangina: mouth ulcer, cough, swollen lymph nodes, decreased appetite, insomnia, skin rash, fever, vomiting, sore throat

injury to the shoulder: arm stiffness or tightness, shoulder pain, neck pain, arm pain, elbow pain, bones are painful, shoulder stiffness or tightness, back pain, muscle cramps, contractures, or spasms

poisoning due to antidepressants: abusing alcohol, emotional symptoms, drug abuse, depression

infection of open wound: insomnia, abnormal appearing skin, leg pain, hand or finger swelling

deep vein thrombosis (dvt): leg cramps or spasms, arm swelling, leg pain, foot or toe swelling, abnormal appearing skin, leg stiffness or tightness, leg swelling

protein deficiency: weakness, depression, nausea, smoking problems, vomiting

myoclonus: insomnia, seizures, abnormal involuntary movements, muscle swelling

bone spur of the calcaneus: leg pain, foot or toe swelling, ankle pain, foot or toe pain, elbow pain

von willebrand disease: blood in stool, muscle swelling, nosebleed

open wound of the back: weight gain, lower body pain, skin lesion, irregular heartbeat

heart block: sharp chest pain, irregular heartbeat, palpitations, weakness, weight gain, chest tightness, fainting, peripheral edema, shortness of breath, dizziness

colonic polyp: diarrhea, pain of the anus, rectal bleeding, heartburn, upper abdominal pain, blood in stool, sharp abdominal pain, flatulence

magnesium deficiency: shortness of breath, dizziness, sharp chest pain, leg pain

female infertility of unknown cause: pain during intercourse, scanty menstrual flow, long menstrual periods, unpredictable menstruation, infertility

pericarditis: sharp chest pain, palpitations, lower body pain, chest tightness, shortness of breath, sharp abdominal pain

attention deficit hyperactivity disorder (adhd): anxiety and nervousness, restlessness, lack of growth, drug abuse, depression, hostile behavior, depressive or psychotic symptoms, antisocial behavior, temper problems

pulmonic valve disease: shortness of breath, emotional symptoms

tietze syndrome: sharp chest pain, cough, rib pain, loss of sensation, chest tightness, nausea, shortness of breath, difficulty breathing

cranial nerve palsy: facial pain, abnormal movement of eyelid, difficulty speaking, headache, diminished vision, double vision, abnormal involuntary movements, symptoms of the face

injury to the arm: arm stiffness or tightness, arm swelling, hand or finger swelling, elbow swelling, hand or finger pain, loss of sensation, arm pain, wrist pain, elbow pain, bones are painful, joint pain, wrist swelling

conversion disorder: seizures, anxiety and nervousness, cough, depression

complex regional pain syndrome: paresthesia, leg pain, hand or finger pain, neck pain, low back pain, ache all over, abnormal involuntary movements, loss of sensation, arm pain, problems with movement, foot or toe pain, back pain

otosclerosis: dizziness, emotional symptoms, diminished hearing

injury to the trunk: shoulder pain, sharp chest pain, neck pain, headache, rib pain, symptoms of the scrotum and testes, low back pain, lower body pain, wrist pain, bones are painful, back pain

hypothyroidism: too little hair, wrist swelling, weight gain, hot flashes, muscle pain, fatigue

primary insomnia: anxiety and nervousness, abnormal breathing sounds, delusions or hallucinations, insomnia, sleepiness, abnormal involuntary movements, fatigue

lice: cough, leg lump or mass, itching of skin, itchy scalp, nasal congestion

vitamin b12 deficiency: knee stiffness or tightness, problems with movement, hot flashes, fatigue, disturbance of memory

diabetes: weight gain, thirst

vulvodynia: vaginal discharge, side pain, pain during pregnancy, vaginal pain, burning abdominal pain, lower abdominal pain, painful urination, cramps and spasms, nausea, pelvic pain, back pain, sharp abdominal pain

endometriosis: burning abdominal pain, lower abdominal pain, intermenstrual bleeding, heavy menstrual flow, hot flashes, pelvic pain, painful menstruation, sharp abdominal pain, infertility

vasculitis: lymphedema, leg pain, headache, foot or toe swelling, leg stiffness or tightness, skin rash, skin lesion, dizziness

concussion: facial pain, difficulty speaking, neck pain, headache, rib pain, double vision, sleepiness, nausea, vomiting, back pain, dizziness, disturbance of memory

oral leukoplakia: skin swelling, elbow weakness, tongue lesions

chronic kidney disease: feeling cold, peripheral edema, shortness of breath, symptoms of the kidneys, fatigue

bladder disorder: involuntary urination, blood in urine, lower abdominal pain, suprapubic pain, painful urination, frequent urination, symptoms of bladder, sharp abdominal pain, retention of urine

chorioretinitis: muscle swelling, diminished vision, double vision, spots or clouds in vision, pain in eye

priapism: elbow weakness, abusing alcohol, penis pain, painful urination

myositis: knee pain, leg pain, headache, loss of sensation, hip pain, problems with movement

mononucleosis: cough, headache, swollen lymph nodes, feeling ill, skin rash, fever, sore throat, nasal congestion

neuralgia: shoulder pain, neck pain, headache, leg pain, low back pain, ache all over, loss of sensation, arm pain, hip pain, back pain

polycystic kidney disease: kidney mass, side pain, low back pain, blood in urine, skin growth, back pain, sharp abdominal pain, retention of urine

bipolar disorder: fears and phobias, excessive anger, anxiety and nervousness, delusions or hallucinations, insomnia, abusing alcohol, depression, depressive or psychotic symptoms, obsessions and compulsions, temper problems

amyloidosis: anxiety and nervousness, shortness of breath, wrist weakness

chronic inflammatory demyelinating polyneuropathy (cidp): loss of sensation, dizziness, problems with movement, weakness

gastroesophageal reflux disease (gerd): regurgitation, sharp chest pain, cough, hoarse voice, burning abdominal pain, difficulty in swallowing, chest tightness, nausea, regurgitation, sharp abdominal pain

vitreous hemorrhage: blindness, diminished vision, lacrimation, symptoms of eye, spots or clouds in vision, pain in eye

poisoning due to antimicrobial drugs: allergic reaction, problems with movement, skin rash, peripheral edema, abnormal involuntary movements, shortness of breath

open wound of the mouth: seizures, mouth ulcer, tongue lesions, toothache, lip swelling, peripheral edema

scleroderma: skin irritation, abnormal appearing skin, feeling ill, itching of skin, skin dryness, peeling, scaliness, or roughness, skin lesion, skin growth, lip swelling

myasthenia gravis: coughing up sputum, weakness, slurring words, double vision, shortness of breath, dizziness, fatigue

hypoglycemia: seizures, sweating, decreased appetite, weakness, feeling ill, problems with movement, depressive or psychotic symptoms, fainting, nausea, sleepiness, abnormal involuntary movements, dizziness

idiopathic absence of menstruation: pain or soreness of breast, vaginal itching, long menstrual periods, lower abdominal pain, absence of menstruation, nausea, heartburn, pelvic pain, sharp abdominal pain

dislocation of the ankle: ankle pain, emotional symptoms, foot or toe pain, ankle swelling

carbon monoxide poisoning: emotional symptoms, headache, depressive or psychotic symptoms, nausea, vomiting, dizziness

panic attack: sharp chest pain, irregular heartbeat, anxiety and nervousness, loss of sensation, weakness, chest tightness, shortness of breath

plantar fasciitis: knee pain, ankle pain, ankle swelling, problems with movement, foot or toe pain, bones are painful, muscle pain

hyperopia: difficulty speaking, eye redness, diminished vision, eye deviation, symptoms of eye, spots or clouds in vision

poisoning due to sedatives: drug abuse, insomnia, depression, hostile behavior, depressive or psychotic symptoms, sleepiness

pemphigus: abnormal appearing skin, skin lesion, hand or finger pain

peyronie disease: impotence, penis pain, emotional symptoms, symptoms of prostate, mass in scrotum

hiatal hernia: regurgitation, sharp chest pain, dizziness, burning abdominal pain, difficulty in swallowing, nausea, heartburn, vomiting blood, upper abdominal pain, back pain, regurgitation, sharp abdominal pain

extrapyramidal effect of drugs: seizures, arm stiffness or tightness, headache, anxiety and nervousness, restlessness, abnormal involuntary movements

meniere disease: facial pain, headache, allergic reaction, ringing in ear, nausea, diminished hearing, ear pain, dizziness

anal fissure: vaginal dryness, pain of the anus, constipation, lower body pain, changes in stool appearance, rectal bleeding, blood in stool, sharp abdominal pain

allergy: fluid retention, itchiness of eye, cough, allergic reaction, abnormal appearing skin, itching of skin, skin swelling, swollen eye, skin rash, lip swelling, peripheral edema

chronic otitis media: cough, allergic reaction, plugged feeling in ear, fluid in ear, pulling at ears, painful sinuses, fever, ear pain, nasal congestion, redness in ear

fracture of the finger: hand or finger swelling, hand or finger pain, foot or toe swelling, hand or finger stiffness or tightness, foot or toe pain

hirschsprung disease: sharp abdominal pain, emotional symptoms, constipation

polymyalgia rheumatica: shoulder pain, sharp chest pain, leg pain, irregular heartbeat, difficulty in swallowing, fatigue

lymphedema: fluid retention, lymphedema, throat swelling, leg pain, foot or toe swelling, abnormal appearing skin, skin lesion, peripheral edema, leg swelling

bladder cancer: bladder mass, excessive urination at night, groin mass, blood in urine, mass in scrotum, symptoms of bladder, retention of urine

acute bronchospasm: sharp chest pain, cough, chest tightness, wheezing, coryza, vomiting, shortness of breath, difficulty breathing, sore throat, nasal congestion, fever

acute glaucoma: eye redness, blindness, foreign body sensation in eye, diminished vision, double vision, symptoms of eye, spots or clouds in vision, pain in eye

open wound of the chest: sharp chest pain, drug abuse

dislocation of the patella: knee stiffness or tightness, knee pain, knee swelling

sciatica: leg cramps or spasms, back cramps or spasms, leg pain, low back pain, lower body pain, loss of sensation, hip pain, leg weakness, problems with movement, unusual color or odor to urine

hypercalcemia: loss of sensation, weakness, dizziness, retention of urine

stress incontinence: involuntary urination, blood in urine, painful urination, intermenstrual bleeding, frequent urination, hot flashes, retention of urine

varicose veins: leg cramps or spasms, lymphedema, leg pain, ache all over, leg lump or mass, skin lesion, peripheral edema, leg swelling

benign kidney cyst: impotence, involuntary urination, side pain, low back pain, blood in urine, vomiting, sharp abdominal pain

hydrocele of the testicle: swelling of scrotum, groin mass, symptoms of the scrotum and testes, groin pain, lower abdominal pain, pain in testicles, mass in scrotum, retention of urine

degenerative disc disease: shoulder pain, paresthesia, leg pain, neck pain, low back pain, lower body pain, loss of sensation, arm pain, hip pain, back pain, joint pain

hirsutism: acne or pimples, abnormal appearing skin, unwanted hair, apnea

dislocation of the foot: vomiting, elbow weakness, foot or toe pain

hydronephrosis: side pain, lower abdominal pain, suprapubic pain, pain in testicles, nausea, vomiting, back pain, sharp abdominal pain

diverticulosis: diarrhea, rectal bleeding, melena, lower abdominal pain, vomiting, heartburn, nausea, upper abdominal pain, blood in stool, sharp abdominal pain

pain after an operation: sharp chest pain, side pain, leg pain, headache, low back pain, neck pain, lower abdominal pain, nausea, vomiting, back pain, sharp abdominal pain

huntington disease: elbow weakness, anxiety and nervousness

lymphoma: regurgitation, regurgitation.1, groin mass, itchy ear(s), hoarse voice, neck mass, fatigue

dermatitis due to sun exposure: acne or pimples, abnormal appearing skin, skin moles, irregular appearing scalp, lack of growth, skin swelling, skin dryness, peeling, scaliness, or roughness, skin rash, skin lesion

anemia due to chronic kidney disease: weakness, ankle swelling, peripheral edema, recent weight loss, shortness of breath, fatigue

injury to internal organ: sharp chest pain, side pain, frequent urination, back pain, sharp abdominal pain, retention of urine

scleritis: eye redness, abnormal involuntary movements, headache, spots or clouds in vision, pain in eye

pterygium: eye redness, acne or pimples, foreign body sensation in eye, diminished vision, lacrimation, symptoms of eye, spots or clouds in vision

fungal infection of the skin: acne or pimples, abnormal appearing skin, too little hair, irregular appearing scalp, itching of skin, skin swelling, skin dryness, peeling, scaliness, or roughness, skin rash, skin lesion, itchy scalp

insulin overdose: emotional symptoms, depressive or psychotic symptoms

syndrome of inappropriate secretion of adh (siadh): cross-eyed, dizziness, feeling ill

foreign body in the ear: bleeding from ear, fluid in ear, throat feels tight, diminished hearing, ear pain

premenstrual tension syndrome: headache, premenstrual tension or irritability, lower abdominal pain, unpredictable menstruation, depressive or psychotic symptoms, back pain

orbital cellulitis: eye redness, swollen eye, diminished hearing, symptoms of eye, peripheral edema, fever, pain in eye

injury to the leg: knee pain, leg pain, infant feeding problem, foot or toe swelling, ankle pain, knee stiffness or tightness, ankle swelling, problems with movement, foot or toe pain, knee swelling, irregular appearing nails, leg swelling

hepatic encephalopathy: fluid retention, abusing alcohol, depressive or psychotic symptoms, fainting, shortness of breath, sharp abdominal pain

bone cancer: leg pain, low back pain, problems with movement, peripheral edema, fatigue

syringomyelia: back pain, shoulder pain, fainting, headache

pulmonary fibrosis: sharp chest pain, cough, chest tightness, fainting, fever, shortness of breath, difficulty breathing

mitral valve disease: sweating, sharp chest pain, nightmares, irregular heartbeat, increased heart rate, chest tightness, shortness of breath, dizziness, fatigue

parkinson disease: difficulty speaking, weakness, leg stiffness or tightness, problems with movement, abnormal involuntary movements, dizziness, focal weakness, disturbance of memory, stiffness all over

gout: knee pain, hand or finger swelling, hand or finger pain, foot or toe swelling, ankle pain, ankle swelling, wrist pain, foot or toe pain, knee swelling, joint pain, wrist swelling, leg swelling

otitis media: cough, plugged feeling in ear, fluid in ear, pulling at ears, coryza, diminished hearing, vomiting, ear pain, sore throat, nasal congestion, fever

drug abuse (opioids): excessive anger, anxiety and nervousness, restlessness, drug abuse, delusions or hallucinations, insomnia, depression, abusing alcohol, depressive or psychotic symptoms, temper problems

myelodysplastic syndrome: fatigue, difficulty speaking, chills

fracture of the shoulder: arm stiffness or tightness, shoulder pain, shoulder swelling, arm pain, neck swelling, bones are painful, shoulder stiffness or tightness

acute kidney injury: kidney mass, sharp chest pain, weakness, symptoms of the kidneys, nausea, peripheral edema, vomiting, shortness of breath, dizziness, sharp abdominal pain, retention of urine

threatened pregnancy: vaginal discharge, spotting or bleeding during pregnancy, blood clots during menstrual periods, back pain, uterine contractions, lower abdominal pain, intermenstrual bleeding, cramps and spasms, pelvic pain, problems during pregnancy, sharp abdominal pain

intracranial abscess: seizures, depressive or psychotic symptoms, headache

gum disease: facial pain, mouth ulcer, pain in gums, gum pain, jaw swelling, toothache, lip swelling, peripheral edema, fever, ear pain, bleeding gums

open wound from surgical incision: skin swelling, skin lesion, flatulence

gastrointestinal hemorrhage: diarrhea, sharp abdominal pain, changes in stool appearance, rectal bleeding, melena, weakness, fainting, nausea, blood in stool, vomiting blood, dizziness, vomiting

seborrheic dermatitis: acne or pimples, abnormal appearing skin, too little hair, irregular appearing scalp, itching of skin, skin dryness, peeling, scaliness, or roughness, skin rash, skin lesion, skin growth, symptoms of the face, dry or flaky scalp

drug abuse (methamphetamine): palpitations, anxiety and nervousness, feeling ill, drug abuse, abusing alcohol, hostile behavior, depressive or psychotic symptoms, shortness of breath

torticollis: shoulder pain, neck pain, throat swelling, headache, neck stiffness or tightness, arm pain, neck cramps or spasms, abnormal involuntary movements

poisoning due to antihypertensives: sharp abdominal pain, depressive or psychotic symptoms, weakness

tension headache: back cramps or spasms, chills, neck pain, headache, anxiety and nervousness, neck stiffness or tightness, nausea, dizziness

alcohol intoxication: sharp chest pain, anxiety and nervousness, abusing alcohol, problems with movement, depression, depressive or psychotic symptoms, vomiting, abnormal involuntary movements

scurvy: sharp abdominal pain, knee lump or mass

narcolepsy: headache, insomnia, sleepiness, apnea, shortness of breath, fatigue, disturbance of memory

food allergy: cough, hand or finger swelling, allergic reaction, abnormal appearing skin, itching of skin, skin rash, lip swelling, vomiting, nasal congestion

labyrinthitis: sweating, headache, plugged feeling in ear, loss of sensation, ear pain, nausea, diminished hearing, vomiting, spots or clouds in vision, dizziness

anxiety: fears and phobias, sharp chest pain, irregular heartbeat, headache, palpitations, anxiety and nervousness, insomnia, increased heart rate, depression, depressive or psychotic symptoms, abnormal involuntary movements, shortness of breath

impulse control disorder: excessive anger, excessive appetite, anxiety and nervousness, delusions or hallucinations, insomnia, depression, depressive or psychotic symptoms, temper problems

stenosis of the tear duct: white discharge from eye, cough, abnormal movement of eyelid, lacrimation, symptoms of eye

abscess of nose: cough, sinus congestion, irritable infant, coryza, vomiting, sore throat, nasal congestion, fever

omphalitis: irregular belly button, emotional symptoms, flatulence

leukemia: muscle stiffness or tightness, fever, mouth pain, fatigue

bell palsy: facial pain, headache, symptoms of the face, loss of sensation, weakness, diminished vision, symptoms of eye, peripheral edema, abnormal involuntary movements, focal weakness

conjunctivitis due to allergy: itchiness of eye, cough, eye redness, allergic reaction, eye burns or stings, diminished vision, swollen eye, lacrimation, symptoms of eye, pain in eye, nasal congestion, sneezing

drug reaction: throat swelling, headache, allergic reaction, abnormal appearing skin, itching of skin, skin rash, nausea, peripheral edema, vomiting, shortness of breath, dizziness

adrenal cancer: dizziness, diminished hearing

myopia: eye redness, eye moves abnormally, blindness, foreign body sensation in eye, diminished vision, eye deviation, symptoms of eye, spots or clouds in vision, pain in eye

osteoarthritis: knee pain, leg pain, hand or finger pain, ankle pain, hip pain, knee weakness, elbow pain, knee swelling, back pain, muscle pain, joint pain

thyroid disease: difficulty in swallowing, lump in throat, neck mass, throat feels tight

pharyngitis: cough, hoarse voice, wheezing, fever, sore throat

chronic rheumatic fever: sharp chest pain, palpitations, increased heart rate, chest tightness, throat feels tight, shortness of breath, dizziness

hypocalcemia: sharp chest pain, constipation, leg weakness, abnormal involuntary movements, shortness of breath

macular degeneration: itchiness of eye, abnormal movement of eyelid, bleeding from eye, blindness, foreign body sensation in eye, diminished vision, double vision, lacrimation, symptoms of eye, spots or clouds in vision, pain in eye

pneumonia: chills, sharp chest pain, cough, weakness, wheezing, coryza, vomiting, shortness of breath, difficulty breathing, sore throat, nasal congestion, fever

cold sore: mouth ulcer, vaginal itching, skin swelling, skin rash, lip sore, lip swelling, sore throat

premature ventricular contractions (pvc's): impotence, sharp chest pain, irregular heartbeat, palpitations, chest tightness, fainting, sleepiness, shortness of breath

testicular cancer: anxiety and nervousness, diminished hearing, mass in scrotum

hydrocephalus: seizures, headache, lack of growth, problems with movement, depressive or psychotic symptoms, vomiting, abnormal involuntary movements

breast cancer: pain or soreness of breast, lump or mass of breast, bleeding or discharge from nipple, hot flashes

anemia due to malignancy: difficulty in swallowing, shortness of breath, fatigue, flatulence

esophageal varices: dizziness, nausea

endometrial cancer: vaginal itching, absence of menstruation, intermenstrual bleeding, hot flashes, vaginal bleeding after menopause

cystic fibrosis: intermenstrual bleeding, decreased appetite, cough, feeling ill

intertrigo (skin condition): acne or pimples, abnormal appearing skin, skin swelling, skin dryness, peeling, scaliness, or roughness, skin rash, skin lesion

parathyroid adenoma: anxiety and nervousness, shoulder pain, throat feels tight, disturbance of memory

glucocorticoid deficiency: diarrhea, shortness of breath, lack of growth

temporomandibular joint disorder: facial pain, neck pain, headache, diminished hearing, ear pain, pain in eye, sore throat, nasal congestion

wilson disease: insomnia, cough, sleepiness

vesicoureteral reflux: suprapubic pain, fever, blood in urine, involuntary urination

vitamin a deficiency: knee lump or mass, hand or finger pain

gonorrhea: vaginal discharge, penile discharge, vaginal itching, problems with movement, vaginal pain, sharp abdominal pain

fracture of the rib: shoulder pain, sharp chest pain, side pain, back mass or lump, rib pain, ache all over, hurts to breath, hip pain, bones are painful, back pain, shortness of breath

ependymoma: diminished vision, pain in eye, emotional symptoms, headache

hepatitis due to a toxin: jaundice, rectal bleeding, feeling ill, itching of skin, depression, nausea, vomiting, sharp abdominal pain

vaginal cyst: vaginal discharge, spotting or bleeding during pregnancy, blood clots during menstrual periods, pain during pregnancy, vaginal pain, lower abdominal pain, intermenstrual bleeding, heavy menstrual flow, cramps and spasms, pelvic pain, problems during pregnancy, sharp abdominal pain

open wound of the shoulder: abusing alcohol, shoulder pain, arm pain

ectopic pregnancy: vaginal discharge, pain during pregnancy, lower abdominal pain, intermenstrual bleeding, nausea, pelvic pain, dizziness, sharp abdominal pain

chronic knee pain: knee pain, leg pain, knee stiffness or tightness, hip pain, knee weakness, knee swelling, back pain, leg swelling, joint pain

pinguecula: itching of scrotum, lacrimation, symptoms of eye, headache

hypergammaglobulinemia: blood in stool, fatigue

alcohol abuse: anxiety and nervousness, drug abuse, depression, hostile behavior, abusing alcohol, low self-esteem, depressive or psychotic symptoms, smoking problems, vomiting blood

carpal tunnel syndrome: paresthesia, hand or finger swelling, hand or finger pain, neck pain, hand or finger stiffness or tightness, arm pain, loss of sensation, wrist pain, elbow pain, arm weakness, wrist swelling

pituitary disorder: headache, pain in eye, lack of growth, hot flashes

kidney stone: side pain, low back pain, blood in urine, lower abdominal pain, suprapubic pain, painful urination, frequent urination, vomiting, back pain, sharp abdominal pain, retention of urine

autism: seizures, difficulty speaking, constipation, long menstrual periods, lack of growth, hostile behavior, depressive or psychotic symptoms, antisocial behavior, temper problems

cat scratch disease: groin mass, skin swelling, itchy eyelid

chronic glaucoma: white discharge from eye, itchiness of eye, mass on eyelid, eye burns or stings, foreign body sensation in eye, diminished vision, lacrimation, symptoms of eye, spots or clouds in vision, pain in eye

retinal detachment: itchiness of eye, blindness, diminished vision, double vision, lacrimation, symptoms of eye, spots or clouds in vision, pain in eye

aplastic anemia: weakness, lack of growth, slurring words, nausea, fever, fatigue

overflow incontinence: impotence, involuntary urination, blood in urine, hand or finger stiffness or tightness, suprapubic pain, symptoms of bladder, retention of urine

hemolytic anemia: cough, fatigue, skin growth, nausea

lateral epicondylitis (tennis elbow): shoulder pain, hand or finger pain, loss of sensation, arm pain, hand or finger stiffness or tightness, wrist pain, elbow pain, joint pain

open wound of the eye: white discharge from eye, diminished vision, symptoms of eye, spots or clouds in vision, pain in eye

syphilis: vaginal discharge, skin rash, muscle pain, headache

diabetic kidney disease: blood in stool, impotence

nose disorder: facial pain, cough, headache, sinus congestion, nosebleed, painful sinuses, coryza, fever, ear pain, difficulty breathing, sore throat, nasal congestion

drug withdrawal: chills, anxiety and nervousness, depression, nausea, vomiting, dizziness, sharp abdominal pain

dental caries: facial pain, skin irritation, pain in gums, gum pain, restlessness, jaw swelling, skin swelling, toothache, mouth pain, neck swelling, peripheral edema, ear pain

hypercholesterolemia: sharp chest pain, excessive urination at night, palpitations, hand or finger stiffness or tightness, weight gain

fracture of the patella: knee pain, leg pain, hip pain, leg weakness, bones are painful, knee swelling

kidney failure: sharp chest pain, arm swelling, nausea, vomiting, shortness of breath, symptoms of the kidneys, swollen abdomen, leg swelling

fracture of the neck: leg pain, low back pain, lower body pain, hip pain, elbow pain

muscle spasm: sharp chest pain, neck pain, leg pain, headache, low back pain, back pain, loss of sensation, arm pain, abnormal involuntary movements, muscle cramps, contractures, or spasms

hemophilia: frontal headache, leg pain, cough, bleeding gums

hyperosmotic hyperketotic state: weakness, frequent urination, cough

peritonsillar abscess: throat swelling, headache, swollen lymph nodes, difficulty in swallowing, throat feels tight, ear pain, sore throat

gastroparesis: regurgitation.¹, sharp chest pain, burning abdominal pain, upper abdominal pain, nausea, vomiting, regurgitation, sharp abdominal pain

itching of unknown cause: fluid retention, vaginal itching, allergic reaction, abnormal appearing skin, itching of skin, skin dryness, peeling, scaliness, or roughness, skin rash, problems during pregnancy, itchy scalp

polycythemia vera: headache, weight gain, symptoms of eye, dizziness, fatigue

thrombocytopenia: sharp chest pain, blood in urine, irregular appearing scalp, nosebleed, blood in stool, fatigue, bleeding gums

head and neck cancer: hoarse voice, plugged feeling in ear, hemoptysis, difficulty in swallowing, mouth pain, throat feels tight, neck mass, sore throat

pseudohypoparathyroidism: wrist pain, elbow weakness, knee pain, leg pain

goiter: lump in throat, weight gain, difficulty in swallowing, hot flashes, fatigue

urge incontinence: involuntary urination, vaginal itching, excessive urination at night, constipation, blood in urine, painful urination, frequent urination, symptoms of bladder, retention of urine

edward syndrome: suprapubic pain, cross-eyed

open wound of the arm: knee weakness, redness in or around nose, elbow pain, arm pain

muscular dystrophy: cough, hip pain, feeling cold, fatigue, nasal congestion

mittelschmerz: diarrhea, lower abdominal pain, pelvic pain, vomiting, painful menstruation, sharp abdominal pain

corneal abrasion: white discharge from eye, itchiness of eye, eye redness, foreign body sensation in eye, diminished vision, lacrimation, symptoms of eye, pain in eye, eyelid swelling

anemia of chronic disease: dizziness, emotional symptoms, weakness, feeling ill

dysthymic disorder: excessive anger, anxiety and nervousness, insomnia, slurring words, loss of sex drive, depression, depressive or psychotic symptoms, disturbance of memory, temper problems

scarlet fever: cough, throat swelling, skin swelling, skin rash, fever, sore throat

hypertensive heart disease: sharp chest pain, palpitations, weakness, insomnia, chest tightness, heartburn, recent pregnancy, shortness of breath, difficulty breathing, fatigue, leg swelling

drug abuse (barbiturates): anxiety and nervousness, drug abuse, delusions or hallucinations, depression, hostile behavior, abnormal involuntary movements

polycystic ovarian syndrome (pcos): long menstrual periods, absence of menstruation, intermenstrual bleeding, unpredictable menstruation, weight gain, hot flashes, pelvic pain, infertility

encephalitis: headache, loss of sensation, insomnia, dizziness, disturbance of memory

cyst of the eyelid: abnormal movement of eyelid, muscle swelling, mass on eyelid, diminished vision, skin growth

balanitis: penis pain, diaper rash, penis redness, cough, abnormal appearing skin, itching of skin, suprapubic pain, painful urination, skin rash

foreign body in the throat: cough, throat swelling, difficulty in swallowing, infant spitting up, vomiting, shortness of breath, sore throat

drug abuse (cocaine): fears and phobias, excessive anger, sharp chest pain, delusions or hallucinations, drug abuse, abusing alcohol, hostile behavior, depression, depressive or psychotic symptoms

optic neuritis: diminished vision, retention of urine, blindness, headache

alcohol withdrawal: seizures, sharp chest pain, delusions or hallucinations, abusing alcohol, antisocial behavior, depressive or psychotic symptoms, fainting, vomiting, abnormal involuntary movements, dizziness

premature atrial contractions (pacs): irregular heartbeat, palpitations, muscle swelling, fainting, shortness of breath, dizziness, fatigue

hemiplegia: arm stiffness or tightness, seizures, difficulty speaking, headache, weakness, loss of sensation, slurring words, problems with movement, abnormal involuntary movements

hammer toe: loss of sensation, foot or toe pain, skin lesion, skin growth

open wound of the cheek: facial pain, wrist pain

joint effusion: knee pain, ankle pain, knee stiffness or tightness, ankle swelling, wrist pain, problems with movement, elbow pain, knee swelling, wrist swelling

open wound of the knee: leg pain, leg swelling

meningioma: headache, weakness, depressive or psychotic symptoms, dizziness, disturbance of memory

brain cancer: seizures, difficulty speaking, headache, decreased appetite, weakness, slurring words, focal weakness, disturbance of memory

placental abruption: spotting or bleeding during pregnancy, uterine contractions, emotional symptoms, nausea

seasonal allergies (hay fever): itchiness of eye, cough, headache, allergic reaction, frontal headache, lacrimation, coryza, ear pain, sore throat, nasal congestion, sneezing

lung cancer: cough, decreased appetite, hemoptysis, leg weakness, smoking problems, shortness of breath, fatigue

primary kidney disease: impotence, blood in urine, lack of growth, peripheral edema, symptoms of the kidneys

uterine cancer: groin mass, vaginal bleeding after menopause, pelvic pain

dry eye of unknown cause: white discharge from eye, itchiness of eye, abnormal movement of eyelid, eye redness, foreign body sensation in eye, diminished vision, double vision, lacrimation, symptoms of eye, spots or clouds in vision, pain in eye

fibrocystic breast disease: intermenstrual bleeding, lump or mass of breast, bleeding or discharge from nipple, pain or soreness of breast

fungal infection of the hair: skin irritation, acne or pimples, abnormal appearing skin, irregular appearing scalp, itching of skin, skin swelling, skin dryness, peeling, scaliness, or roughness, skin rash, skin lesion, skin growth, pelvic pain, itchy scalp

tooth abscess: facial pain, pain in gums, gum pain, jaw swelling, skin swelling, toothache, neck swelling, mouth pain, lip swelling, peripheral edema

envenomation from spider or animal bite: fluid retention, arm swelling, paresthesia, hand or finger swelling, foot or toe swelling, abnormal appearing skin, allergic reaction, itching of skin, skin swelling

vacterl syndrome: suprapubic pain, emotional symptoms

vertebrobasilar insufficiency: back pain, dizziness, sharp chest pain, leg pain

rectal disorder: diarrhea, pain of the anus, constipation, itching of the anus, rectal bleeding, melena, burning abdominal pain, cramps and spasms, heartburn, blood in stool, sharp abdominal pain

atonic bladder: impotence, emotional symptoms, suprapubic pain, symptoms of bladder, retention of urine

benign paroxysmal positional vertical (bppv): headache, irregular heartbeat, frontal headache, weakness, problems with movement, fainting, nausea, vomiting, dizziness

blepharospasm: low back weakness, diminished vision, abnormal movement of eyelid, headache

sarcoidosis: facial pain, sharp chest pain, cough, headache, chest tightness, peripheral edema, shortness of breath, pain in eye

metastatic cancer: vaginal dryness, decreased appetite, neck mass, focal weakness, fatigue

trigger finger (finger disorder): hand or finger swelling, hand or finger pain, hand or finger cramps or spasms, hand or finger stiffness or tightness, wrist pain, bones are painful

stye: itchiness of eye, eye redness, abnormal appearing skin, eyelid lesion or rash, mass on eyelid, eye burns or stings, skin swelling, swollen eye, symptoms of eye, pain in eye, eyelid swelling

hemochromatosis: abnormal appearing skin, ache all over, difficulty speaking

osteochondroma: knee pain, abnormal appearing skin, lower abdominal pain, foot or toe pain, skin lesion, skin growth, lip swelling

cushing syndrome: weight gain, emotional symptoms

typhoid fever: wrist pain, fever

vitreous degeneration: eye redness, foreign body sensation in eye, diminished vision, double vision, lacrimation, symptoms of eye, spots or clouds in vision, pain in eye

atrophic skin condition: skin irritation, acne or pimples, abnormal appearing skin, skin moles, skin swelling, wrinkles on skin, skin lesion, skin growth, lip swelling

aspergillosis: shortness of breath, knee lump or mass

uterine atony: spotting or bleeding during pregnancy, back cramps or spasms, pain during pregnancy, blood in urine, uterine contractions, lower abdominal pain, intermenstrual bleeding, problems during pregnancy, sharp abdominal pain

trichinosis: nasal congestion, knee lump or mass

whooping cough: cough, vomiting, shortness of breath, sore throat, nasal congestion

open wound of the lip: facial pain, mouth ulcer, dry lips, mouth pain, lip swelling

subacute thyroiditis: pain during pregnancy, palpitations, uterine contractions, blood in stool, problems during pregnancy

oral mucosal lesion: facial pain, mouth ulcer, cough, tongue lesions, gum pain, toothache, mouth pain, lip swelling, fever, sore throat

open wound due to trauma: skin on arm or hand looks infected, wrist swelling

intracerebral hemorrhage: seizures, headache, weakness, blindness, diminished vision, depressive or psychotic symptoms, nausea, vomiting, dizziness, focal weakness

alzheimer disease: difficulty speaking, irregular appearing scalp, delusions or hallucinations, eye burns or stings, depression, hostile behavior, depressive or psychotic symptoms, disturbance of memory

vaginismus: pain during intercourse, vaginal pain, lower abdominal pain, suprapubic pain, pelvic pain, sharp abdominal pain

systemic lupus erythematosus (sle): sharp chest pain, knee pain, ache all over, hand or finger stiffness or tightness, bones are painful, leg swelling

premature ovarian failure: lack of growth, absence of menstruation, weight gain, pelvic pain, infertility

thoracic outlet syndrome: shoulder pain, sharp chest pain, hand or finger pain, decreased appetite, loss of sensation, arm pain

ganglion cyst: hand or finger lump or mass, knee pain, leg pain, knee lump or mass, hand or finger pain, wrist lump or mass, foot or toe pain, skin growth, knee swelling, wrist swelling

dislocation of the knee: knee stiffness or tightness, knee pain, knee swelling

crohn disease: diarrhea, pain of the anus, regurgitation.¹, rectal bleeding, burning abdominal pain, vomiting, nausea, blood in stool, regurgitation, sharp abdominal pain

postoperative infection: abnormal appearing skin, jaw swelling, skin swelling, skin on leg or foot looks infected, fever, sharp abdominal pain

folate deficiency: shortness of breath, sharp chest pain, vomiting blood, difficulty breathing, sharp abdominal pain

fluid overload: fluid retention, sharp chest pain, hand or finger swelling, nausea, peripheral edema, vomiting, shortness of breath, sharp abdominal pain

atrial flutter: sharp chest pain, irregular heartbeat, palpitations, swollen lymph nodes, increased heart rate, chest tightness, frequent urination, shortness of breath

skin disorder: skin irritation, acne or pimples, abnormal appearing skin, skin moles, irregular appearing scalp, itching of skin, skin swelling, skin dryness, peeling, scaliness, or roughness, skin lesion, skin growth

floaters: foreign body sensation in eye, diminished vision, lacrimation, symptoms of eye, spots or clouds in vision

tooth disorder: facial pain, mouth ulcer, pain in gums, headache, gum pain, jaw swelling, toothache, peripheral edema, ear pain, bleeding gums

heart attack: sweating, sharp chest pain, burning chest pain, irregular heartbeat, arm pain, increased heart rate, chest tightness, fainting, nausea, heartburn, shortness of breath

open wound of the abdomen: irregular belly button, sharp abdominal pain, blindness

fracture of the leg: knee pain, leg pain, ankle pain, leg stiffness or tightness, hip pain, knee weakness, ankle swelling, problems with movement, knee swelling, leg swelling

oral thrush (yeast infection): mouth ulcer, tongue lesions, cough, constipation, irritable infant, mouth pain, skin rash, fever, sore throat, nasal congestion

pityriasis rosea: warts, vaginal itching, abnormal appearing skin, itching of skin, skin swelling, skin rash

allergy to animals: cough, allergic reaction, cross-eyed, sore throat, nasal congestion

orthostatic hypotension: sharp chest pain, irregular heartbeat, headache, weakness, feeling ill, fainting, abnormal involuntary movements, dizziness

obstructive sleep apnea (osa): sweating, abnormal breathing sounds, insomnia, difficulty in swallowing, weight gain, sleepiness, mouth dryness, apnea, abnormal involuntary movements, difficulty breathing, shortness of breath, fatigue

hypokalemia: diarrhea, sharp chest pain, headache, loss of sensation, vomiting, fainting, nausea, fever, shortness of breath, sharp abdominal pain

psoriasis: abnormal appearing skin, skin moles, irregular appearing scalp, itching of skin, skin swelling, skin dryness, peeling, scaliness, or roughness, skin rash, skin lesion, skin growth, joint pain, itchy scalp

dislocation of the shoulder: arm stiffness or tightness, shoulder pain, arm swelling, arm pain, wrist pain, neck mass

intussusception: blood in stool, sharp abdominal pain, emotional symptoms

cervicitis: vaginal discharge, vaginal itching, pain during pregnancy, painful urination, suprapubic pain, nausea, pelvic pain, sharp abdominal pain

abscess of the pharynx: sharp chest pain, cough, throat swelling, headache, difficulty in swallowing, fever, sore throat, nasal congestion

primary thrombocythemia: fatigue, dizziness, flatulence

arthritis of the hip: knee pain, leg pain, groin pain, low back pain, ache all over, lower body pain, hip stiffness or tightness, hip pain, problems with movement, pelvic pain, back pain, joint pain

decubitus ulcer: skin on leg or foot looks infected, incontinence of stool, skin lesion, difficulty speaking

hypernatremia: weakness, fainting, fever, shortness of breath, difficulty breathing

sensorineural hearing loss: itchy ear(s), hoarse voice, fluid in ear, plugged feeling in ear, ringing in ear, throat feels tight, diminished hearing, ear pain, dizziness, nasal congestion

chronic ulcer: skin pain, skin lesion

osteoporosis: leg cramps or spasms, early or late onset of menopause, back pain, hip pain, bones are painful, stomach bloating, joint pain, muscle cramps, contractures, or spasms, disturbance of memory

ileus: diarrhea, pain of the anus, constipation, headache, burning abdominal pain, lower abdominal pain, nausea, vomiting, sharp abdominal pain

sickle cell crisis: sharp chest pain, knee pain, leg pain, low back pain, ache all over, burning abdominal pain, arm pain, hip pain, vomiting, back pain, sharp abdominal pain

urethritis: penis pain, penile discharge, vaginal itching, blood in urine, suprapubic pain, painful urination, frequent urination, sharp abdominal pain, retention of urine

prostatitis: impotence, chills, blood in urine, lower abdominal pain, painful urination, frequent urination, fever, back pain, sharp abdominal pain, retention of urine

otitis externa (swimmer's ear): facial pain, cough, itchy ear(s), ringing in ear, plugged feeling in ear, fluid in ear, diminished hearing, fever, ear pain, sore throat, redness in ear

poisoning due to anticonvulsants: depression, dizziness, problems with movement, difficulty speaking

testicular torsion: swelling of scrotum, emotional symptoms, symptoms of the scrotum and testes, pain in testicles, back pain, sharp abdominal pain

tricuspid valve disease: anxiety and nervousness, emotional symptoms

urethral stricture: involuntary urination, symptoms of the scrotum and testes, symptoms of prostate, blood in urine, suprapubic pain, painful urination, symptoms of bladder, retention of urine

vitamin d deficiency: arm stiffness or tightness, fatigue, hot flashes

hydatidiform mole: spotting or bleeding during pregnancy, pain during pregnancy, diminished vision, dizziness, sharp abdominal pain

pain disorder affecting the neck: neck pain, headache, low back pain, neck stiffness or tightness, arm pain, insomnia, back pain, dizziness, disturbance of memory

tuberculosis: shortness of breath, vaginal itching, cough, congestion in chest

pelvic fistula: vaginal discharge, elbow weakness, dizziness

acute bronchiolitis: cough, decreased appetite, hurts to breath, irritable infant, wheezing, pulling at ears, coryza, vomiting, shortness of breath, difficulty breathing, nasal congestion, fever

presbyopia: abnormal movement of eyelid, difficulty speaking, foreign body sensation in eye, diminished vision, symptoms of eye, spots or clouds in vision, pain in eye

dementia: delusions or hallucinations, insomnia, problems with movement, hostile behavior, depressive or psychotic symptoms, abnormal involuntary movements, focal weakness, disturbance of memory

insect bite: fluid retention, hand or finger swelling, abnormal appearing skin, itching of skin, skin swelling, skin rash, skin lesion, lip swelling, peripheral edema, leg swelling

paroxysmal ventricular tachycardia: sharp chest pain, irregular heartbeat, decreased heart rate, weight gain, increased heart rate, chest tightness, fainting, shortness of breath, dizziness, fatigue

congenital heart defect: arm swelling, sharp chest pain, hand or finger stiffness or tightness, lack of growth

connective tissue disorder: difficulty in swallowing, joint pain, feeling ill

foreign body in the eye: white discharge from eye, itchiness of eye, eye redness, eye burns or stings, foreign body sensation in eye, lacrimation, symptoms of eye, pain in eye

poisoning due to gas: sharp chest pain, cough, headache, wheezing, shortness of breath, dizziness, drainage in throat

pyogenic skin infection: hand or finger swelling, leg pain, foot or toe swelling, abnormal appearing skin, hand or finger pain, skin swelling, foot or toe pain, skin lesion, skin rash, peripheral edema, leg swelling

endometrial hyperplasia: back weakness, involuntary urination, heavy menstrual flow, unpredictable menstruation, vaginal bleeding after menopause

acanthosis nigricans: acne or pimples, skin lesion, weight gain, skin growth

central atherosclerosis: shortness of breath, blood in urine, fatigue, irregular heartbeat

viral exanthem: cough, abnormal appearing skin, decreased appetite, itching of skin, skin swelling, skin rash, pulling at ears, vomiting, nasal congestion, fever

noninfectious gastroenteritis: diarrhea, fluid retention, chills, headache, rectal bleeding, decreased appetite, burning abdominal pain, vomiting, nausea, blood in stool, sharp abdominal pain, fever

benign prostatic hyperplasia (bph): impotence, swelling of scrotum, low urine output, excessive urination at night, involuntary urination, symptoms of prostate, blood in urine, hesitancy, pain in testicles, frequent urination, symptoms of bladder, retention of urine

menopause: sweating, involuntary urination, vaginal itching, absence of menstruation, unpredictable menstruation, hot flashes

primary immunodeficiency: arm stiffness or tightness, cough, frontal headache, decreased appetite, fatigue

ovarian cancer: groin mass, decreased appetite, sharp abdominal pain, stomach bloating

cataract: itchiness of eye, abnormal movement of eyelid, cloudy eye, blindness, diminished vision, double vision, lacrimation, symptoms of eye, spots or clouds in vision, pain in eye

dislocation of the hip: abusing alcohol, leg pain, hip pain

spinal stenosis: shoulder pain, paresthesia, neck pain, leg pain, headache, low back pain, lower body pain, loss of sensation, arm pain, hip pain, problems with movement, back pain

intestinal obstruction: pain of the anus, vaginal itching, constipation, burning abdominal pain, stomach bloating, nausea, vomiting, sharp abdominal pain, retention of urine

heart contusion: elbow weakness, depression

congenital malformation syndrome: lack of growth, seizures, gum pain, diminished hearing

sporotrichosis: wrist pain, knee pain

lymphangitis: neck swelling, arm pain

wernicke korsakoff syndrome: anxiety and nervousness, depressive or psychotic symptoms, abusing alcohol

intestinal disease: diarrhea, regurgitation.1, sharp chest pain, burning abdominal pain, fainting, nausea, vomiting, regurgitation, sharp abdominal pain

acute bronchitis: coughing up sputum, sharp chest pain, cough, headache, congestion in chest, wheezing, coryza, fever, shortness of breath, difficulty breathing, sore throat, nasal congestion

persistent vomiting of unknown cause: diarrhea, nausea, vomiting, abnormal involuntary movements, dizziness, sharp abdominal pain, fever

open wound of the foot: foot or toe swelling, foot or toe pain, skin lesion, skin on leg or foot looks infected, irregular appearing nails, foot or toe lump or mass

myocarditis: palpitations, dizziness, sharp chest pain

preeclampsia: problems during pregnancy, vaginal redness, headache, pain during pregnancy, uterine contractions, lower abdominal pain, recent pregnancy, spots or clouds in vision, sharp abdominal pain

ischemic heart disease: lymphedema, sharp chest pain, palpitations, fatigue, chest tightness, throat feels tight, peripheral edema, shortness of breath, dizziness, difficulty breathing, muscle pain

neurofibromatosis: groin mass, abnormal appearing skin, abnormal involuntary movements, headache

chickenpox: cough, abnormal appearing skin, itching of skin, pain in testicles, skin rash, fever

pancreatic cancer: diarrhea, arm swelling, jaundice, ache all over, stomach bloating, nausea, sharp abdominal pain

neuropathy due to drugs: cough, loss of sensation, problems with movement, foot or toe pain, vomiting

croup: cough, hoarse voice, abnormal breathing sounds, wheezing, coryza, pulling at ears, fever, shortness of breath, vomiting, sore throat, nasal congestion

idiopathic excessive menstruation: vaginal discharge, blood clots during menstrual periods, involuntary urination, long menstrual periods, intermenstrual bleeding, unpredictable menstruation, heavy menstrual flow, cramps and spasms, frequent menstruation, painful menstruation, sharp abdominal pain

amblyopia: pus draining from ear, cross-eyed, diminished vision, eye deviation, pain in eye

meckel diverticulum: lower abdominal pain, knee lump or mass

dislocation of the wrist: elbow weakness, depression, arm pain, hand or finger pain

ear drum damage: cough, pus draining from ear, bleeding from ear, ringing in ear, fluid in ear, plugged feeling in ear, pulling at ears, diminished hearing, ear pain, nasal congestion, redness in ear

erectile dysfunction: impotence, involuntary urination, pain during intercourse, excessive urination at night, symptoms of prostate, blood in urine, loss of sex drive, frequent urination, pain in testicles, retention of urine

temporary or benign blood in urine: regurgitation.¹, involuntary urination, blood in urine, lower abdominal pain, suprapubic pain, painful urination, frequent urination, symptoms of bladder, back pain, regurgitation, sharp abdominal pain, retention of urine

kidney disease due to longstanding hypertension: feeling cold, shortness of breath, symptoms of the kidneys, difficulty speaking

chondromalacia of the patella: knee pain, leg pain, knee weakness, problems with movement, bones are painful, knee swelling

onychomycosis: abnormal appearing skin, too little hair, skin swelling, skin dryness, peeling, scaliness, or roughness, skin on leg or foot looks infected, foot or toe pain, skin growth, skin rash, irregular appearing nails

urethral disorder: involuntary urination, side pain, suprapubic pain, painful urination, abusing alcohol, vomiting, sharp abdominal pain, retention of urine

lyme disease: headache, abnormal appearing skin, hip pain, depressive or psychotic symptoms, fever, symptoms of the face, fatigue

iron deficiency anemia: regurgitation, regurgitation.1, rectal bleeding, weakness, intermenstrual bleeding, heavy menstrual flow, weight gain, heartburn, blood in stool, dizziness, fatigue

acute respiratory distress syndrome (ARDS): chills, sharp chest pain, cough, chest tightness, depressive or psychotic symptoms, wheezing, fever, shortness of breath, difficulty breathing

toxic multinodular goiter: involuntary urination, irregular heartbeat, double vision, abnormal involuntary movements, fatigue

open wound of the finger: skin on arm or hand looks infected, hand or finger stiffness or tightness, hand or finger swelling, hand or finger pain

autonomic nervous system disorder: leg pain, headache, decreased appetite, difficulty in swallowing, dizziness

psychosexual disorder: impotence, involuntary urination, pain during intercourse, premature ejaculation, loss of sex drive, depression, fatigue

anemia: changes in stool appearance, melena, weakness, nosebleed, vomiting blood, dizziness, shortness of breath, fatigue

tendinitis: shoulder pain, knee pain, leg pain, hand or finger pain, hand or finger swelling, ankle pain, arm pain, hip pain, wrist pain, foot or toe pain

common cold: chills, cough, headache, wheezing, coryza, vomiting, ear pain, flu-like syndrome, sore throat, nasal congestion, fever

amyotrophic lateral sclerosis (ALS): leg cramps or spasms, difficulty speaking, weakness, difficulty in swallowing, abnormal involuntary movements

central retinal artery or vein occlusion: irregular heartbeat, blindness, foreign body sensation in eye, diminished vision, symptoms of eye, pain in eye

paroxysmal supraventricular tachycardia: involuntary urination, sharp chest pain, irregular heartbeat, palpitations, weakness, increased heart rate, chest tightness, shortness of breath, dizziness

venous insufficiency: leg cramps or spasms, lymphedema, fluid retention, burning chest pain, leg pain, abnormal appearing skin, skin on leg or foot looks infected, skin lesion

trichomonas infection: vaginal discharge, vaginal itching, pain during pregnancy, lower abdominal pain, unpredictable menstruation, nausea, vomiting, sharp abdominal pain

acne: long menstrual periods, acne or pimples, abnormal appearing skin, skin moles, irregular appearing scalp, skin swelling, skin dryness, peeling, scaliness, or roughness, skin rash, skin growth

depression: excessive anger, anxiety and nervousness, delusions or hallucinations, drug abuse, insomnia, depression, abusing alcohol, depressive or psychotic symptoms, hostile behavior, disturbance of memory, temper problems

drug abuse: sweating, anxiety and nervousness, drug abuse, delusions or hallucinations, abusing alcohol, depression, depressive or psychotic symptoms, antisocial behavior, hostile behavior, smoking problems

urinary tract obstruction: excessive urination at night, side pain, symptoms of prostate, blood in urine, suprapubic pain, painful urination, frequent urination, back pain, sharp abdominal pain, retention of urine

diabetes insipidus: dizziness, emotional symptoms

iridocyclitis: cloudy eye, headache, eye redness, eye burns or stings, foreign body sensation in eye, diminished vision, lacrimation, symptoms of eye, pain in eye

varicocele of the testicles: pain of the anus, swelling of scrotum, involuntary urination, groin pain, symptoms of the scrotum and testes, lower abdominal pain, pain in testicles, skin growth, mass in scrotum, infertility

irritable bowel syndrome: diarrhea, anxiety and nervousness, burning abdominal pain, lower abdominal pain, insomnia, upper abdominal pain, nausea, sharp abdominal pain, flatulence

fracture of the foot: foot or toe swelling, ankle pain, foot or toe weakness, ankle swelling, foot or toe pain, foot or toe stiffness or tightness

ovarian cyst: vaginal discharge, burning abdominal pain, lower abdominal pain, intermenstrual bleeding, nausea, pelvic pain, vomiting, painful menstruation, sharp abdominal pain

chlamydia: vaginal discharge, vaginal itching, vaginal pain, lower abdominal pain, pelvic pain, sharp abdominal pain

parasitic disease: cough, hand or finger swelling, abnormal appearing skin, skin rash, sharp abdominal pain, retention of urine

fracture of the jaw: facial pain, jaw swelling, mouth pain, bones are painful, peripheral edema, pain in eye

lipoma: shoulder lump or mass, arm lump or mass, back mass or lump, groin mass, abnormal appearing skin, skin swelling, skin lesion, bones are painful, skin growth, neck mass

female genitalia infection: vaginal discharge, vulvar irritation, groin pain, skin swelling, vulvar sore, skin lesion, vaginal pain

pulmonary hypertension: sharp chest pain, cough, palpitations, feeling ill, hemoptysis, apnea, shortness of breath, difficulty breathing, fatigue

thyroid nodule: back weakness, hoarse voice, difficulty in swallowing, throat feels tight, diminished hearing, neck mass, fatigue

broken tooth: facial pain, difficulty eating, gum pain, dry lips, toothache, lip swelling, bleeding gums

dumping syndrome: vomiting, nausea, knee lump or mass

lymphadenitis: cough, neck pain, skin swelling, neck swelling, fever, ear pain, neck mass, sharp abdominal pain, sore throat

injury to the face: facial pain, neck pain, headache, bleeding from ear, neck stiffness or tightness, nosebleed, mouth pain, diminished hearing, ear pain

aortic valve disease: lymphedema, sharp chest pain, irregular heartbeat, groin mass, palpitations, fainting, peripheral edema, shortness of breath, difficulty breathing

rheumatoid arthritis: knee pain, hand or finger swelling, elbow swelling, hand or finger pain, ache all over, joint swelling, wrist pain, peripheral edema, joint pain, wrist swelling

spermatocele: frequent urination, pain in testicles, mass in scrotum, elbow weakness, retention of urine

impetigo: mouth ulcer, cough, abnormal appearing skin, itching of skin, skin swelling, skin rash, skin lesion, sore in nose, fever, nasal congestion

anal fistula: blood in stool, rectal bleeding, pain of the anus, mass in scrotum

hypothermia: emotional symptoms, depressive or psychotic symptoms, weakness, fainting

oppositional disorder: excessive anger, low urine output, restlessness, hostile behavior, antisocial behavior, low self-esteem, fainting, depressive or psychotic symptoms, obsessions and compulsions, temper problems

migraine: headache, blindness, diminished vision, nausea, vomiting, spots or clouds in vision, dizziness, symptoms of the face, disturbance of memory

diabetic peripheral neuropathy: lymphedema, paresthesia, leg pain, foot or toe swelling, loss of sensation, problems with movement, foot or toe pain, skin lesion, foot or toe stiffness or tightness

testicular disorder: impotence, symptoms of the scrotum and testes, hoarse voice, loss of sex drive, fatigue

gestational diabetes: vaginal redness, pain during pregnancy, uterine contractions, pelvic pressure, problems during pregnancy

hidradenitis suppurativa: groin mass, arm pain, skin swelling, skin rash, skin lesion, skin growth

valley fever: fever, shortness of breath, shoulder swelling, hand or finger pain

conjunctivitis due to bacteria: cough, eye redness, abnormal appearing skin, fever, sore throat, nasal congestion

lewy body dementia: delusions or hallucinations, hostile behavior, depressive or psychotic symptoms, abnormal involuntary movements, disturbance of memory

multiple myeloma: weakness, problems with movement, lip swelling, fatigue, disturbance of memory

head injury: facial pain, neck pain, headache, double vision, fainting, lip swelling, back pain, dizziness

ascending cholangitis: jaundice, fever, shortness of breath, sharp abdominal pain, retention of urine

idiopathic irregular menstrual cycle: long menstrual periods, lower abdominal pain, intermenstrual bleeding, unpredictable menstruation, heavy menstrual flow, cramps and spasms, frequent menstruation, pelvic pain, painful menstruation, sharp abdominal pain, infertility

interstitial lung disease: cough, headache, abnormal breathing sounds, wheezing, sleepiness, fever, shortness of breath, sore throat, nasal congestion

mononeuritis: shoulder pain, leg pain, hand or finger pain, ankle pain, loss of sensation, arm pain, wrist pain, foot or toe pain, elbow pain, hand or finger weakness

malaria: knee lump or mass, fever, fainting, headache

somatization disorder: ache all over, anxiety and nervousness, depression, fainting, dizziness

hypovolemia: diarrhea, decreased appetite, feeling ill, fainting, nausea, vomiting, dizziness, sharp abdominal pain, fever

schizophrenia: fears and phobias, excessive anger, hysterical behavior, anxiety and nervousness, delusions or hallucinations, insomnia, depression, hostile behavior, depressive or psychotic symptoms, low self-esteem, temper problems

knee ligament or meniscus tear: knee pain, knee lump or mass, knee stiffness or tightness, leg stiffness or tightness, knee weakness, leg weakness, knee swelling

endocarditis: sharp chest pain, irregular heartbeat, palpitations, increased heart rate, shortness of breath, dizziness

sepsis: chills, cough, decreased appetite, weakness, feeling ill, suprapubic pain, vomiting, shortness of breath, difficulty breathing, sharp abdominal pain, fever

heat stroke: dizziness, feeling hot

cholecystitis: regurgitation, sharp chest pain, side pain, lower body pain, burning abdominal pain, stomach bloating, nausea, upper abdominal pain, vomiting, back pain, symptoms of the kidneys, sharp abdominal pain

cardiac arrest: sharp chest pain, arm swelling, irregular heartbeat, palpitations, decreased heart rate, weakness, shortness of breath, difficulty breathing

cardiomyopathy: sharp chest pain, irregular heartbeat, decreased heart rate, chest tightness, heartburn, peripheral edema, shortness of breath, fatigue

social phobia: fears and phobias, excessive anger, excessive appetite, anxiety and nervousness, delusions or hallucinations, insomnia, abusing alcohol, depression, depressive or psychotic symptoms

meningitis: cough, neck pain, headache, ache all over, neck stiffness or tightness, nausea, vomiting, fever

spherocytosis: elbow weakness, skin rash, cough

hormone disorder: headache, acne or pimples, excessive growth, lack of growth, hot flashes

raynaud disease: loss of sensation, hand or finger swelling, hand or finger pain

reactive arthritis: knee lump or mass, hip pain

scabies: foot or toe swelling, abnormal appearing skin, itching of skin, unpredictable menstruation, skin swelling, skin rash, problems during pregnancy

ear wax impaction: cough, fluid in ear, ringing in ear, plugged feeling in ear, sinus congestion, pulling at ears, diminished hearing, fever, ear pain, nasal congestion

hypertension of pregnancy: spotting or bleeding during pregnancy, pain during pregnancy, headache, uterine contractions, heartburn, problems during pregnancy

peripheral arterial embolism: paresthesia, leg pain, abnormal appearing skin, loss of sensation, knee swelling, leg swelling

rosacea: lymphedema, acne or pimples, abnormal appearing skin, skin moles, itching of skin, skin swelling, skin dryness, peeling, scaliness, or roughness, skin lesion, symptoms of eye, skin growth

fracture of the skull: headache, drug abuse, depressive or psychotic symptoms, diminished hearing, vomiting

uveitis: elbow weakness, diminished vision, symptoms of eye

fracture of the facial bones: redness in or around nose, facial pain, headache, abusing alcohol, double vision, swollen eye, lip swelling, peripheral edema, pain in eye

tracheitis: cough, hoarse voice, fever, shortness of breath, sore throat, nasal congestion, sneezing

jaw disorder: facial pain, headache, jaw swelling, difficulty in swallowing, toothache, mouth pain, peripheral edema, neck mass

perirectal infection: pain of the anus, swelling of scrotum, abnormal appearing skin, skin swelling, pain in testicles, skin lesion

breast cyst: vaginal dryness, lump or mass of breast, skin growth, pain or soreness of breast

post-traumatic stress disorder (ptsd): excessive anger, anxiety and nervousness, drug abuse, delusions or hallucinations, insomnia, depression, hostile behavior, depressive or psychotic symptoms, abusing alcohol, temper problems

kidney cancer: kidney mass, involuntary urination, groin mass, blood in urine, retention of urine

vulvar cancer: insomnia, back pain, emotional symptoms

blepharitis: white discharge from eye, itchiness of eye, eye redness, eye burns or stings, diminished vision, swollen eye, lacrimation, symptoms of eye, spots or clouds in vision, pain in eye, eyelid swelling

celiac disease: regurgitation.1, sharp chest pain, nausea, peripheral edema, vomiting, sharp abdominal pain

cystitis: involuntary urination, side pain, blood in urine, lower abdominal pain, painful urination, suprapubic pain, frequent urination, pelvic pain, symptoms of bladder, back pain, sharp abdominal pain, retention of urine

sickle cell anemia: joint pain, leg pain, ache all over, dry lips, pulling at ears, fever, back pain, temper problems

subconjunctival hemorrhage: facial pain, headache, eye redness, bleeding from eye, foreign body sensation in eye, diminished vision, symptoms of eye, pain in eye

hemorrhoids: mass or swelling around the anus, pain of the anus, constipation, itching of the anus, rectal bleeding, lower body pain, changes in stool appearance, melena, heartburn, blood in stool, sharp abdominal pain

contact dermatitis: skin irritation, acne or pimples, allergic reaction, abnormal appearing skin, skin moles, itching of skin, skin swelling, skin dryness, peeling, scaliness, or roughness, swollen eye, skin lesion, skin rash

sinus bradycardia: sharp chest pain, irregular heartbeat, palpitations, decreased heart rate, weakness, feeling ill, increased heart rate, chest tightness, fainting, shortness of breath, dizziness

high blood pressure: sharp chest pain, headache

pelvic inflammatory disease: vaginal discharge, burning abdominal pain, lower abdominal pain, suprapubic pain, painful urination, intermenstrual bleeding, nausea, pelvic pain, vomiting, back pain, sharp abdominal pain

liver disease: diarrhea, jaundice, side pain, blood in stool, weakness, unusual color or odor to urine, heartburn, upper abdominal pain, peripheral edema, nausea, shortness of breath, sharp abdominal pain

chronic constipation: pain of the anus, constipation, rectal bleeding, changes in stool appearance, burning abdominal pain, lower abdominal pain, vomiting, nausea, blood in stool, sharp abdominal pain, retention of urine

thyroid cancer: difficulty in swallowing, swollen lymph nodes, neck mass, fatigue

flu: diarrhea, chills, cough, headache, ache all over, coryza, nausea, vomiting, sore throat, fever

friedrich ataxia: ear pain, cough, knee lump or mass

tic (movement) disorder: abnormal movement of eyelid, headache, problems with movement, depressive or psychotic symptoms, symptoms of eye, abnormal involuntary movements

skin polyp: skin irritation, warts, acne or pimples, abnormal appearing skin, skin moles, irregular appearing scalp, itching of skin, skin swelling, skin dryness, peeling, scaliness, or roughness, skin lesion, skin growth

brachial neuritis: shoulder pain, paresthesia, neck pain, headache, low back pain, hand or finger pain, loss of sensation, arm pain, elbow pain, back pain, hand or finger weakness

cervical cancer: vaginal discharge, vulvar irritation, vaginal itching, jaundice, heavy menstrual flow, pelvic pain

adrenal adenoma: anxiety and nervousness, sharp abdominal pain, shortness of breath, back weakness

esophagitis: sharp chest pain, cough, burning abdominal pain, difficulty in swallowing, chest tightness, heartburn, upper abdominal pain, nausea, vomiting, shortness of breath, sharp abdominal pain, sore throat

gas gangrene: wrist pain, sharp abdominal pain

yeast infection: vaginal discharge, diaper rash, vaginal itching, suprapubic pain, frequent urination, skin rash, pelvic pain, vaginal pain, sharp abdominal pain

spina bifida: involuntary urination, headache, eye moves abnormally, skin lesion, back pain, disturbance of memory

drug poisoning due to medication: drug abuse, slurring words, depression, abusing alcohol, depressive or psychotic symptoms, sleepiness, lip swelling

alcoholic liver disease: diarrhea, weight gain, abusing alcohol, stomach bloating, peripheral edema, abnormal involuntary movements, sharp abdominal pain

malignant hypertension: sharp chest pain, headache, lower body pain, insomnia, depressive or psychotic symptoms, vomiting, shortness of breath

diverticulitis: diarrhea, chills, side pain, constipation, burning abdominal pain, lower abdominal pain, vomiting, nausea, upper abdominal pain, blood in stool, sharp abdominal pain, fever

moyamoya disease: elbow weakness, depressive or psychotic symptoms

heat exhaustion: fluid retention, sharp chest pain, headache, weakness, fainting, vomiting, shortness of breath, dizziness

psychotic disorder: fears and phobias, excessive anger, hysterical behavior, anxiety and nervousness, delusions or hallucinations, insomnia, depression, abusing alcohol, depressive or psychotic symptoms, hostile behavior, temper problems

frostbite: elbow weakness, sharp chest pain, foot or toe pain

atrophy of the corpus cavernosum: impotence, abnormal appearing skin, frequent urination, bumps on penis, skin growth

smoking or tobacco addiction: coughing up sputum, excessive anger, sharp chest pain, cough, headache, hurts to breath, drug abuse, hemoptysis, abusing alcohol, smoking problems, shortness of breath

sprain or strain: shoulder pain, knee pain, leg pain, hand or finger pain, headache, neck pain, low back pain, ankle pain, arm pain, wrist pain, foot or toe pain, back pain

essential tremor: hoarse voice, loss of sensation, problems with movement, abnormal involuntary movements, dizziness, muscle pain, disturbance of memory

open wound of the ear: facial pain, bleeding from ear, dry lips, fluid in ear, ear pain

foreign body in the nose: regurgitation.1, nasal congestion

idiopathic painful menstruation: vaginal discharge, blood clots during menstrual periods, vaginal itching, long menstrual periods, lower abdominal pain, heavy menstrual flow, unpredictable menstruation, cramps and spasms, pelvic pain, painful menstruation, sharp abdominal pain

down syndrome: seizures, cough, difficulty speaking, decreased appetite, lack of growth, nasal congestion

idiopathic infrequent menstruation: unpredictable menstruation, sharp abdominal pain, retention of urine, nausea

pneumothorax: shoulder pain, sharp chest pain, cough, side pain, back pain, hurts to breath, drug abuse, shortness of breath

de quervain disease: shoulder pain, hand or finger swelling, hand or finger pain, arm pain, wrist pain, abnormal involuntary movements, wrist swelling

fracture of the vertebra: neck pain, low back pain, hand or finger stiffness or tightness, leg stiffness or tightness, hip pain, bones are painful, pelvic pain, back pain

human immunodeficiency virus infection (hiv): fears and phobias, nightmares, drug abuse

mumps: swollen lymph nodes, ear pain, sore throat, shoulder swelling

subarachnoid hemorrhage: headache, loss of sensation, fainting, symptoms of eye, vomiting, dizziness

acute fatty liver of pregnancy (aflp): sharp abdominal pain, emotional symptoms

ectropion: white discharge from eye, eye redness, lacrimation, symptoms of eye, pain in eye

scar: abnormal appearing skin, skin moles, itching of skin, skin swelling, skin lesion, skin growth, lip swelling

lactose intolerance: diarrhea, impotence, burning abdominal pain, shortness of breath, flatulence, nasal congestion

eustachian tube dysfunction (ear disorder): allergic reaction, abnormal breathing sounds, swollen or red tonsils, ringing in ear, plugged feeling in ear, diminished hearing, ear pain, dizziness, sore throat, nasal congestion, redness in ear

appendicitis: diarrhea, side pain, decreased appetite, burning abdominal pain, lower abdominal pain, vomiting, stomach bloating, upper abdominal pain, nausea, fever, sharp abdominal pain

graves disease: sweating, involuntary urination, irregular heartbeat, palpitations, hemoptysis, abnormal involuntary movements, dizziness

dissociative disorder: back weakness, excessive anger, anxiety and nervousness, depressive or psychotic symptoms, disturbance of memory

open wound of the face: facial pain, wrist swelling

dislocation of the vertebra: elbow weakness, leg pain, neck pain, low back pain, back pain

phimosis: penis pain, penis redness, symptoms of the scrotum and testes, blood in urine, painful urination, retention of urine

hyperemesis gravidarum: diarrhea, problems during pregnancy, pain during pregnancy, headache, burning abdominal pain, weakness, nausea, vomiting, vomiting blood, dizziness, sharp abdominal pain

pregnancy: spotting or bleeding during pregnancy, pain during pregnancy, uterine contractions, pelvic pressure, cramps and spasms, problems during pregnancy

thalassemia: insomnia, elbow weakness

placenta previa: spotting or bleeding during pregnancy, cramps and spasms, involuntary urination, pain during pregnancy

epidural hemorrhage: dizziness, depressive or psychotic symptoms, emotional symptoms

septic arthritis: knee pain, leg pain, hip pain, knee swelling, fever

athlete's foot: foot or toe swelling, abnormal appearing skin, skin swelling, skin dryness, peeling, scaliness, or roughness, foot or toe pain, skin lesion, skin rash, irregular appearing nails

pleural effusion: sharp abdominal pain, sharp chest pain, cough, side pain, rib pain, hurts to breath, weakness, back pain, difficulty breathing, shortness of breath

aphakia: spots or clouds in vision, diminished vision, symptoms of eye, eye burns or stings

vulvar disorder: vaginal discharge, vulvar irritation, vaginal itching, pain during intercourse, skin dryness, peeling, scaliness, or roughness, vaginal pain

sialoadenitis: facial pain, cough, swollen lymph nodes, jaw swelling, neck swelling, peripheral edema, neck mass, sore throat, nasal congestion

gynecomastia: pain or soreness of breast, lump or mass of breast, neck pain, skin swelling, bones are painful, back pain, problems with shape or size of breast

urinary tract infection: side pain, blood in urine, lower abdominal pain, painful urination, suprapubic pain, frequent urination, nausea, vomiting, back pain, retention of urine, fever

histoplasmosis: elbow weakness, lacrimation, cough

erythema multiforme: mouth ulcer, difficulty in swallowing, skin rash, vomiting, fever

scoliosis: leg pain, low back pain, knee stiffness or tightness, lower body pain, problems with movement, knee swelling, back pain

bunion: knee pain, skin moles, foot or toe pain, skin growth, foot or toe lump or mass

arrhythmia: leg cramps or spasms, sharp chest pain, palpitations, chest tightness, fainting, shortness of breath, dizziness, fatigue

trigeminal neuralgia: facial pain, headache, toothache, pain in eye, abnormal involuntary movements, dizziness, symptoms of the face

ankylosing spondylitis: paresthesia, knee pain, leg pain, low back pain, ache all over, lower body pain, hip pain, elbow pain, back pain, stiffness all over

peripheral nerve disorder: paresthesia, leg pain, abnormal involuntary movements, loss of sensation, arm pain, leg weakness, problems with movement, foot or toe pain, arm weakness, back pain, dizziness, disturbance of memory

sebaceous cyst: hand or finger lump or mass, arm lump or mass, back mass or lump, acne or pimples, abnormal appearing skin, skin moles, irregular appearing scalp, skin swelling, skin lesion, skin growth, neck mass

poisoning due to antipsychotics: anxiety and nervousness, sharp chest pain, delusions or hallucinations

neurosis: excessive anger, headache, anxiety and nervousness, delusions or hallucinations, drug abuse, insomnia, depression, hostile behavior, depressive or psychotic symptoms, smoking problems, obsessions and compulsions

prostate cancer: impotence, involuntary urination, pain during intercourse, excessive urination at night, flushing, symptoms of prostate, blood in urine, retention of urine

cerebral edema: neck pain, headache, arm pain, vomiting, dizziness, focal weakness

dislocation of the finger: difficulty speaking, hand or finger swelling, hand or finger pain, hand or finger stiffness or tightness, wrist pain

birth trauma: arm stiffness or tightness, emotional symptoms, depressive or psychotic symptoms

chronic pancreatitis: diarrhea, ache all over, abusing alcohol, skin growth, nausea, vomiting, back pain, sharp abdominal pain

hematoma: swelling of scrotum, arm swelling, ache all over, skin swelling, sharp abdominal pain

carcinoid syndrome: involuntary urination, knee lump or mass

open wound of the head: abusing alcohol, headache

seborrheic keratosis: skin irritation, warts, acne or pimples, abnormal appearing skin, skin moles, irregular appearing scalp, itching of skin, skin swelling, skin rash, skin lesion, skin growth

burn: skin irritation, knee pain, hand or finger pain, headache, wrist pain, wrist swelling

spontaneous abortion: spotting or bleeding during pregnancy, blood clots during menstrual periods, pain during pregnancy, uterine contractions, burning abdominal pain, lower abdominal pain, intermenstrual bleeding, heavy menstrual flow, cramps and spasms, pelvic pain, problems during pregnancy, sharp abdominal pain

genital herpes: vaginal discharge, vaginal itching, painful urination, suprapubic pain, skin rash, skin lesion, recent pregnancy

adjustment reaction: fears and phobias, excessive anger, nightmares, anxiety and nervousness, restlessness, delusions or hallucinations, insomnia, depression, hostile behavior

gallstone: regurgitation.¹, sharp chest pain, side pain, lower body pain, burning abdominal pain, heartburn, upper abdominal pain, nausea, vomiting, back pain, sharp abdominal pain

multiple sclerosis: paresthesia, headache, loss of sensation, weakness, leg weakness, problems with movement, abnormal involuntary movements, dizziness, focal weakness, fatigue, disturbance of memory

zenker diverticulum: elbow weakness, sharp chest pain, sore throat

fracture of the pelvis: knee pain, difficulty speaking, leg pain, groin pain, ache all over, hip pain, back pain

pneumoconiosis: fever, shortness of breath, dizziness, cough

hyperlipidemia: weight gain, sharp chest pain, smoking problems

ulcerative colitis: diarrhea, swollen lymph nodes, rectal bleeding, blood in stool, burning abdominal pain, lower abdominal pain, nausea, vomiting, sharp abdominal pain

male genitalia infection: swelling of scrotum, abnormal appearing skin, irritable infant, pain in testicles, bumps on penis, mass in scrotum

hpv: warts, involuntary urination, vaginal itching

angina: sweating, sharp chest pain, irregular heartbeat, palpitations, lower body pain, arm pain, increased heart rate, chest tightness, hot flashes, shortness of breath, dizziness

injury to the spinal cord: back pain, retention of urine, neck pain, headache

nasal polyp: facial pain, cough, headache, allergic reaction, frontal headache, hoarse voice, painful sinuses, nasal congestion

lichen simplex: vaginal itching, difficulty speaking, itching of skin, skin rash, skin lesion

trichiasis: emotional symptoms, eye redness, eyelid lesion or rash, foreign body sensation in eye, diminished vision

acariasis: skin rash, swelling of scrotum, emotional symptoms, itching of skin

colorectal cancer: mass or swelling around the anus, pain of the anus, rectal bleeding, blood in stool, drainage in throat, sharp abdominal pain

skin pigmentation disorder: warts, acne or pimples, abnormal appearing skin, skin moles, irregular appearing scalp, itching of skin, skin swelling, skin dryness, peeling, scaliness, or roughness, skin rash, skin lesion, skin growth

factitious disorder: elbow weakness, depression, depressive or psychotic symptoms, disturbance of memory

lymphogranuloma venereum: ear pain, sore throat, knee lump or mass

galactorrhea of unknown cause: pain or soreness of breast, anxiety and nervousness, emotional symptoms, bleeding or discharge from nipple

g6pd enzyme deficiency: emotional symptoms, cough

nerve impingement near the shoulder: shoulder pain, neck pain, hand or finger stiffness or tightness, arm pain, problems with movement, elbow pain, shoulder stiffness or tightness, shoulder weakness

toxoplasmosis: diminished vision, emotional symptoms

fibroadenoma: vaginal dryness, pain or soreness of breast, lump or mass of breast, bones are painful, hot flashes, bleeding or discharge from nipple

open wound of the hand: skin on arm or hand looks infected, hand or finger stiffness or tightness, hand or finger swelling, hand or finger pain

missed abortion: spotting or bleeding during pregnancy, blood clots during menstrual periods, pain during pregnancy, lower abdominal pain, intermenstrual bleeding, cramps and spasms, blood in stool, problems during pregnancy, sharp abdominal pain

diabetic ketoacidosis: diarrhea, fluid retention, sharp chest pain, decreased appetite, weakness, depressive or psychotic symptoms, frequent urination, nausea, vomiting, sharp abdominal pain

granuloma inguinale: sharp chest pain, knee lump or mass

obsessive compulsive disorder (ocd): anxiety and nervousness, lack of growth, feeling ill, depression, hostile behavior, depressive or psychotic symptoms, low self-esteem, obsessions and compulsions, temper problems

injury of the ankle: leg pain, foot or toe swelling, ankle pain, foot or toe weakness, ankle swelling, foot or toe pain, joint pain, wrist swelling

hyponatremia: seizures, sharp chest pain, back pain, weakness, fainting, nausea, vomiting, shortness of breath, sharp abdominal pain

stricture of the esophagus: regurgitation, sharp chest pain, difficulty in swallowing, problems with movement, heartburn, vomiting

fracture of the ankle: leg pain, foot or toe swelling, ankle pain, ankle swelling, knee weakness, foot or toe pain, ankle weakness

soft tissue sarcoma: groin mass, abnormal appearing skin, skin moles, itching of skin, skin dryness, peeling, scaliness, or roughness, skin lesion, skin growth

bone disorder: leg cramps or spasms, difficulty speaking, leg pain, knee pain, bones are painful, muscle stiffness or tightness, back pain

epilepsy: seizures, muscle weakness, difficulty speaking, headache, lack of growth, abnormal involuntary movements, disturbance of memory

personality disorder: fears and phobias, excessive anger, anxiety and nervousness, drug abuse, delusions or hallucinations, insomnia, depression, hostile behavior, depressive or psychotic symptoms, low self-esteem, temper problems

shingles (herpes zoster): facial pain, sharp chest pain, headache, abnormal appearing skin, itching of skin, skin rash, skin lesion, back pain, pain in eye

tourette syndrome: headache, allergic reaction, drug abuse, depressive or psychotic symptoms, abnormal involuntary movements

avascular necrosis: shoulder pain, knee pain, drug abuse, hip pain

strep throat: chills, cough, headache, ache all over, decreased appetite, difficulty in swallowing, skin rash, vomiting, ear pain, sore throat, nasal congestion, fever

spinocerebellar ataxia: abnormal involuntary movements, anxiety and nervousness, problems with movement, dizziness

osteomyelitis: arm swelling, difficulty speaking, hand or finger swelling, hand or finger pain, skin on leg or foot looks infected, skin lesion, bones are painful

sjogren syndrome: ache all over, difficulty in swallowing, diminished vision, symptoms of eye, joint pain, pain in eye

adhesive capsulitis of the shoulder: shoulder pain, neck pain, ache all over, arm pain, shoulder stiffness or tightness, muscle pain

viral hepatitis: melena, hand or finger stiffness or tightness, abusing alcohol, stomach bloating, sharp abdominal pain

tonsillar hypertrophy: cough, apnea, abnormal breathing sounds, difficulty in swallowing, fever, sore throat, nasal congestion, redness in ear

gastritis: diarrhea, regurgitation, sharp chest pain, headache, burning abdominal pain, nausea, vomiting, vomiting blood, sharp abdominal pain, fever

skin cancer: skin irritation, warts, abnormal appearing skin, skin moles, irregular appearing scalp, skin swelling, skin dryness, peeling, scaliness, or roughness, skin lesion, skin growth, lip swelling

rheumatic fever: itchiness of eye, knee lump or mass

aphthous ulcer: mouth ulcer, cough, tongue lesions, headache, toothache, mouth pain, fever, sore throat

tonsillitis: lump in throat, throat redness, abnormal breathing sounds, swollen or red tonsils, throat feels tight, diminished hearing, sore throat, nasal congestion, redness in ear

intestinal cancer: diarrhea, foot or toe swelling, throat feels tight, neck mass, sharp abdominal pain

rocky mountain spotted fever: wrist pain, headache

stomach cancer: diarrhea, burning abdominal pain, difficulty in swallowing, nausea, heartburn, vomiting, sharp abdominal pain

developmental disability: seizures, fears and phobias, difficulty speaking, restlessness, lack of growth, delusions or hallucinations, hostile behavior, depressive or psychotic symptoms, antisocial behavior, obsessions and compulsions, temper problems

acute stress reaction: sharp chest pain, headache, anxiety and nervousness, burning abdominal pain, insomnia, depression, depressive or psychotic symptoms, abnormal involuntary movements, dizziness, shortness of breath, fatigue

delirium: difficulty speaking, delusions or hallucinations, slurring words, depression, problems with movement, depressive or psychotic symptoms, hostile behavior, abnormal involuntary movements, focal weakness, disturbance of memory

callus: acne or pimples, abnormal appearing skin, foot or toe swelling, skin swelling, skin rash, foot or toe pain, skin growth, skin lesion, irregular appearing nails

guillain barre syndrome: difficulty speaking, leg pain, hand or finger pain, loss of sensation, dizziness

lumbago: side pain, leg pain, low back pain, hip pain, back pain, low back cramps or spasms, muscle pain

deviated nasal septum: facial pain, headache, allergic reaction, abnormal breathing sounds, nosebleed, painful sinuses, apnea, difficulty breathing, sore throat, nasal congestion

hemangioma: lymphedema, abnormal appearing skin, skin moles, irregular appearing scalp, skin swelling, skin dryness, peeling, scaliness, or roughness, skin lesion, skin growth, lip swelling, irregular appearing nails

peripheral arterial disease: leg cramps or spasms, lymphedema, leg pain, feeling cold, foot or toe pain, skin lesion, poor circulation, symptoms of the kidneys

chronic back pain: back stiffness or tightness, back cramps or spasms, side pain, leg pain, neck pain, low back pain, groin pain, lower body pain, loss of sensation, hip pain, back pain

heart failure: fluid retention, sharp chest pain, cough, palpitations, hurts to breath, weakness, weight gain, chest tightness, shortness of breath, difficulty breathing, leg swelling

conjunctivitis: white discharge from eye, itchiness of eye, cough, eye redness, swollen eye, lacrimation, coryza, fever, pain in eye, sore throat, nasal congestion

herniated disk: shoulder pain, paresthesia, neck pain, leg pain, low back pain, loss of sensation, arm pain, hip pain, leg weakness, arm weakness, back pain

rhabdomyolysis: sharp chest pain, leg pain, hoarse voice, arm pain, depressive or psychotic symptoms

breast infection (mastitis): pain or soreness of breast, postpartum problems of the breast, lump or mass of breast, chills, abnormal appearing skin, skin growth, mouth dryness, fever, bleeding or discharge from nipple

abdominal aortic aneurysm: arm swelling, palpitations, back pain, burning abdominal pain, shortness of breath, sharp abdominal pain

pulmonary embolism: sweating, sharp chest pain, side pain, leg pain, cough, weakness, hemoptysis, chest tightness, shortness of breath, difficulty breathing, leg swelling

conduct disorder: seizures, excessive anger, hysterical behavior, lack of growth, depression, hostile behavior, depressive or psychotic symptoms, abusing alcohol, fainting, temper problems

mastectomy: arm stiffness or tightness, skin swelling, pain or soreness of breast

epididymitis: swelling of scrotum, side pain, groin pain, lower body pain, painful urination, pain in testicles, mass in scrotum, sharp abdominal pain, retention of urine

premature rupture of amniotic membrane: elbow weakness, uterine contractions, sharp abdominal pain

molluscum contagiosum: warts, knee lump or mass, acne or pimples, abnormal appearing skin, itching of skin, skin swelling, skin dryness, peeling, scaliness, or roughness, skin rash, skin lesion

necrotizing fasciitis: elbow weakness, leg pain, hip pain

benign vaginal discharge (leukorrhea): vaginal discharge, vaginal redness, vaginal itching, pain during pregnancy, burning abdominal pain, suprapubic pain, painful urination, frequent urination, problems during pregnancy, sharp abdominal pain

bladder obstruction: impotence, involuntary urination, bedwetting, hesitancy, suprapubic pain, frequent urination, symptoms of bladder, retention of urine

melanoma: abnormal appearing skin, swollen lymph nodes, skin moles, irregular appearing scalp, skin swelling, skin lesion, skin growth, itchy eyelid

cervical disorder: pelvic pain, vaginal itching, sharp abdominal pain, pain during intercourse

laryngitis: difficulty speaking, cough, hoarse voice, difficulty in swallowing, throat feels tight, coryza, fever, ear pain, sore throat, nasal congestion

dyshidrosis: acne or pimples, abnormal appearing skin, skin rash, frequent urination, skin lesion

poisoning due to opioids: dizziness, depressive or psychotic symptoms, difficulty speaking, drug abuse

diaper rash: diarrhea, diaper rash, cough, blood in stool, fever, irritable infant, skin rash, pulling at ears, vomiting, nasal congestion, temper problems

lichen planus: abnormal appearing skin, difficulty speaking, skin growth

gastroduodenal ulcer: sharp chest pain, changes in stool appearance, burning abdominal pain, vomiting, upper abdominal pain, nausea, heartburn, blood in stool, vomiting blood, sharp abdominal pain

inguinal hernia: swelling of scrotum, groin pain, symptoms of the scrotum and testes, ache all over, groin mass, lower abdominal pain, pain in testicles, mass in scrotum, sharp abdominal pain, swollen abdomen

eczema: skin irritation, warts, cough, acne or pimples, abnormal appearing skin, allergic reaction, irregular appearing scalp, itching of skin, skin swelling, skin dryness, peeling, scaliness, or roughness, skin rash, skin lesion

asperger syndrome: excessive anger, anxiety and nervousness, lack of growth, depression, hostile behavior, fainting, depressive or psychotic symptoms, antisocial behavior

mucositis: mouth ulcer, tongue lesions, decreased appetite, irritable infant, difficulty in swallowing, mouth pain, fever, sore throat

paronychia: hand or finger lump or mass, hand or finger swelling, hand or finger pain, foot or toe swelling, abnormal appearing skin, sinus congestion, skin on leg or foot looks infected, foot or toe pain, skin on arm or hand looks infected

open wound of the jaw: wrist swelling, lip swelling

white blood cell disease: diarrhea, chills, cough, nausea, heartburn, vomiting, sharp abdominal pain, fatigue, fever

kaposi sarcoma: elbow weakness, depression

spondylolisthesis: leg cramps or spasms, paresthesia, leg pain, neck pain, low back pain, loss of sensation, hip pain, leg weakness, problems with movement, back pain

pseudotumor cerebri: dizziness, headache, diminished vision, abnormal involuntary movements, pain in eye

conjunctivitis due to virus: white discharge from eye, itchiness of eye, cough, eye redness, diminished vision, swollen eye, lacrimation, fever, pain in eye, nasal congestion

open wound of the nose: facial pain, headache, diminished hearing, nosebleed
